Foreword

The Project Team

The final project team is set out above. Several other colleagues made a notable contribution in the early years, and continued to provide support throughout the life of the project. Antoinette Renouf, the original Project Co-ordinator led the team from 1980-83 and established the text corpus and maintained and developed corpus work. Dr Michael Hoey gave a great deal of help in administration and policy guidance in the early period and continued with strong academic guidance. From Collins, Beryl T Atkins played a formative role in the design of the project and in the general training, continuing in her capacity as General Editor she commented on draft dictionary texts throughout.

Some members of the team moved on before the work was completed. Wendy Morris and Clive Upton were two of the original editors. Nigel Turton, Martin Manser, Dieter Wachendorff, Judy Amanthis, Duncan Marshall, Emily Driver, Kathy Kavanagh and Michael Rundell were compilers for substantial periods. Ian Sedwell helped with the computing. Heather Champion, Lorraine Dove, Cheryl Evans and Sue Smith were secretaries.

The project has also benefited greatly from people who, while not regular members of the team, acted in a consultative capacity or provided a specialist service. In particular Marcel Lemmens, grammar consultant, must be mentioned, Cathy Emmott, who helped with the Extra Column, and also Ela Bullon, Helmut Hirschmüller, Debbie Krishnamurthy, Clare Ramsey, and Louise Ravelli.

Acknowledgements

I would like to thank many other people whose names do not appear on the team credits but who made a significant contribution to the compilation of the dictionary.

This project was part of the work of the English Department and its successful completion owes much to the support of the Head of the Department throughout, Professor J T Boulton. In various ways every one of the staff helped and encouraged the work and one or two must be singled out for specific contributions. Dr David Brazil devised the system of recording pronunciations, and transcribed most of them. Tim Lane ensured their transfer to electronic form and gave support on the computational side. Tim Johns encouraged the use of real examples and made experimental classes available. Chris Kennedy, Tony Dudley-Evans, Dr Mike McCarthy, Charles Owen, Phillip King, Dr Kirsten Malmkjaer and Martin Hewings all read drafts, picked holes in them and offered many suggestions for improvement.

Many colleagues in the University of Birmingham contributed notably to the project. Three Pro-Vice Chancellors in turn guided the project through various committees; Professor Harry Prime, Professor John Fage and Professor John Samuels. The Centre for Computing and Computer Sciences was deeply involved throughout and eased problems in the complex final editing.

I would also like to thank the past and present members of Collins staff who have helped in the project.

This dictionary is based on evidence and the evidence comes from hundreds of documents and conversations, kindly made available by the copyright holders. A full list is provided on page xxii.

Such a fundamental re-appraisal of a language requires a high degree of teamwork and large-scale co-ordination of resources. The success of this book and other books to come will owe a great deal to the people and groups mentioned above, and I am very grateful to them for their contributions.

John M Sinclair
Professor of Modern English Language
Editor in Chief

Guide to the Use of the Dictionary

This dictionary is written in ordinary, everyday English. There are only a few special symbols to understand and they are explained below. We also explain how to find things in a long entry. As far as possible each entry follows the same pattern. For instance, if you are looking for a note on the spelling, you will always find it near the beginning of the entry, but if you think you want to know about a phrasal verb you should look near the end of the entry.

In the section that follows, on page xv, there is a short explanation of how this dictionary was designed and made, why it is new and different, and how you can make the best use of it.

The explanations given here refer only to the main text of the dictionary. By the side of the main text you will find an extra column of notes about the structures and meanings. To save space these notes are abbreviated and there is a key to the abbreviations on page xiii.

1 Entries

1.1 An entry in this dictionary begins with a word or group of words in large bold letters starting at the left-most side of the column.

agriculture ... is the practice of farming and the methods that are used to raise and look after crops and animals.

1.2 The main factor in deciding whether or not to include a word as an entry in this dictionary was how often it occurred in our large corpus of texts. However, some words were left out, for example very technical words, the names of countries, cities and people, and some rare foreign words.

2 Order of Entries

2.1 All entries are printed in strict alphabetical order, taking no notice of capital letters, hyphens, apostrophes or spaces between words.

aid
aide
aide-de-camp
AIDS
ail
aileron
ailing
ailment
aim
aimless
ain't
air
air base
airbed

2.2 Sometimes a word can be used either alone or followed by another word, and the addition of the extra word does not change the meaning. If there are no other entries between them in alphabetical order, the word and the combination are explained in the same entry.

wellington ... **Wellingtons** or **wellington boots** are long rubber boots which you wear to keep your feet dry.

2.3 All the uses of a word are usually given together within the same entry. However, sometimes the same letters can form both a word and an abbreviation (no and No.), a set of initials called an acronym (salt and SALT), or a contracted form (shed and she'd). In these cases the word is explained first in all its uses and the abbreviations, acronyms and contractions are explained in separate entries immediately afterwards.

am
Am.
a.m.
amalgam

2.4 Special entries, each in a box □, also appear at their correct place in alphabetical order. Some of these explain the abbreviations used in the extra column. Others show the ways in which you can express some important concepts such as age, measurement, number and time in English. For the full list of these special entries, see page xiii.

3 Pronunciation

3.1 The pronunciation is normally given only for the first form of the word at each entry and is placed immediately after that form.

cabin /kæbɪn/, **cabins** ...

3.2 However, if the word is pronounced in different ways, for example when it is used as a noun and when it is used as a verb, these variations are explained after all the forms.

record, records, recording, recorded. The verb is pronounced /rɪˈkɔːd/ and the noun is pronounced /rekɔːd/.

3.3 Pronunciation is not given for the special entries in boxes, for abbreviations that are rarely used in spoken English, or for entries that consist of two or more words whose pronunciation is given at each of the separate words.

3.4 The system used for pronunciation is described on page xii.

4 Forms and Spellings

4.1 The spelling for each form of a word in the dictionary is given in large bold letters at the beginning of each entry.

4.2 The following forms are usually given, if they are commonly used:

4.2.1 - for nouns, the plural form.

aerosol ... **aerosols** ...
bathing cap, bathing caps ...

4.2.2 - for qualitative adjectives, the comparative and superlative forms.

happy ... **happier, happiest** ...

Where no comparative or superlative forms are given for qualitative adjectives they are formed with 'more' and 'most'.

4.2.3 - for verbs, the third person form of the present tense (the -s form), the present participle (the -ing form), the past tense (the -ed form), and the past participle if it is not the same as the past tense.

place ... **places, placing, placed** ...

take ... **takes, taking, took, taken** ...

4.3 If a word can be used as a noun with a plural and as a verb, and the third person form of the present tense of the verb is the same as the plural form of the noun, the -s form is only given once.

alarm ... **alarms, alarming, alarmed** ...

4.4 If there are any special features about the use of the forms, for example if a particular form or set of forms is used only when a word is used with one particular meaning, these features are explained after the forms.

hang ... The forms **hang, hangs, hanging, hung** are used for the verb except in paragraph 6 where the forms are **hang, hangs, hanging, hanged**...

4.5 One of the forms of a word may also be explained in a separate entry if the form is very common or has a different meaning in some of its uses.

begin ... **begins, beginning, began, begun. 1** If you **begin** to do ...

beginning ... **beginnings. 1** The **beginning** of an event ...

5 Entry notes

5.1 Entry notes may be given after the first form, after the pronunciation, or after all the forms.

5.2 An entry note may show different spellings of the word.

polarize ... **polarizes, polarizing, polarized**; also spelled **polarise** ...

vapour ... **vapours**; also spelled **vapor** in American English ...

baby-sitter, baby-sitters; also spelled without a hyphen ...

5.3 An entry note may explain changes in pronunciation.

default /dɪˈfɔːlt/, **defaults, defaulting, defaulted**. The word **default** is also pronounced /diːfɔːlt/ in paragraph 3.

5.4 An entry note may explain the particular form or forms used for a particular meaning of the words or when the word is used in American or British English.

burst ... **bursts, bursting**. The form **burst** is used in the present tense and is the past tense and past participle of the verb ...

anaesthesia ...; also spelled **anesthesia**, especially in American English.

analogue ... **analogues**; also spelled **analog**, especially for paragraph 3.

5.5 An entry note may refer to all the uses of a word.

assemblage ... **assemblages**; a formal word. **1** An **assemblage** is ... **2 Assemblage** is ...

6 Explanations of meaning and use

6.1 The entry word is always explained by means of a complete sentence. This normally means that the user of the dictionary is shown the word in natural English.

appoint ... **1** If you **appoint** someone to a particular post or to do a particular job, you formally choose them for it or ask them to do it.

becalmed ... If a sailing ship is **becalmed**, it is unable to move because there is no wind.

brave ... **1** Someone who is **brave** shows in their behaviour that they have the courage to do something even though it is frightening, dangerous or difficult.

6.2 In the explanation, the entry word is printed in bold letters. This is done whether it is the first word of the explanation or whether it appears later on.

acumen ... is the ability to make good judgements and decisions in relation to a particular activity, especially business.

bareback ... If you ride **bareback** you ride a horse without a saddle.

6.3 A note about the way in which a word is used may be found after the explanation.

auspicious ... Something that is **auspicious** gives hope of success or evidence that success is likely; a fairly formal word.

6.4 If a word has several senses as a noun, verb, etc, in a particular pattern of use, the first part of the explanation is not repeated.

cistern ... A **cistern** is **1** a container which holds the water that is used to flush a toilet .. **2** a large tank in the roof of a house in which water is stored.

nod ... **1** If you **nod, 1.1** you move your head quickly up and down several times to show that you are answering 'yes' to a question, or to show agreement, understanding, or approval ... **1.2** you bend your head once to indicate something or to give someone a signal to do something ... **1.3** you bend your head once when you meet or leave someone or when they leave you, as a way of saying hello or goodbye ... **1.4** you keep letting your head fall forward because you are falling asleep while sitting down ...

7 Ordering within an entry: paragraphs and sub-paragraphs:

7.1 If a word has only one common use, it is explained, sometimes with examples, within one paragraph and no numbers are used.

ostrich ... An **ostrich** is a large African bird that cannot fly. It has long legs, a long neck, a small head and large soft feathers.

7.2 If a word has several uses, the ordering within the entry has been decided by consideration of several criteria, including frequency, independence of meaning, and concreteness. For a fuller discussion of this point, see page xix.

7.3 If a word has several uses, but all the uses are as a noun, verb, etc, in a particular pattern, they are explained in one paragraph and each use is introduced by a whole number.

applause ... **Applause** is **1** an expression of enjoyment or appreciation by a group of people in which they all clap their hands ... **2** support or praise by a lot of people for something that has been done ...

7.4 If the uses of the word as a noun, or as a verb, etc, are very different from each other, each use may be given in a separate paragraph introduced by a whole number. These differences may be due to the following changes.

7.4.1 - changes in meaning:

clear ... **16** If your skin is **clear**, it is healthy and free from spots or rashes ...
17 If your conscience is **clear**, you do not feel guilty about anything ...
18 If you, your time, or your diary is **clear**, you have no appointments or arrangements ...

join ... **2** If you **join** a queue, you stand at the end of it so that you are part of it ...
3 If you **join** a club, society or organization, you become a member of it or start work as an employee of it ...

7.4.2 - changes in grammar:

affront ... **1** If something is an **affront** to someone, it is a deliberate insult or a challenge to their pride or dignity ... N COUNT: IF PREP THEN *to*
2 If you are **affronted** by something, you feel insulted and your pride and dignity are hurt ... V + O: USU PASS

7.5 Sub-paragraphs, introduced by numbers with a decimal point, may be used when there are more than two senses of a particular pattern.

dryer ... also spelled **drier**. **1** A **dryer** is **1.1** a machine for drying clothes. **1.2** a hairdryer.
2 **Dryer** and **drier** are the comparative forms of **dry**.

appointment ... **1** The **appointment** of someone to do a particular job is the act or process of choosing them to do it.
2 An **appointment** is **2.1** a job or position usually one involving some responsibility ... **2.2** someone who has been chosen for a particular job or position ...

8 Examples

8.1 An example in this dictionary is a group of words that appear in italics within an entry. The examples have been selected to show typical contexts, collocations and grammatical structures. For a fuller discussion of the role of examples see page xv.

8.2 The first example in each entry, or in each paragraph or sub-paragraph, is always preceded by the letters EG in small capital letters.

waterhole ... A **waterhole** is a pond or pool in a desert or other dry area where animals can find water to drink. EG *We camped that evening by a waterhole.*

8.3 The examples will not always consist of complete sentences. When this is the case, they are introduced by three dots.

webbing ... is strong material which is woven in strips and used to make belts or straps, or used in seats to support the springs. EG *...A belt of green webbing... ...canvas webbing.*

8.4 Three dots are placed after an example to separate it from an example that follows.

8.5 Most of the examples in this dictionary are given exactly as they are found in our corpus, or with very minor changes which have been made in order to remove unnecessary distracting information.

9 The use of ▶

9.1 The symbol ▶ is used in this dictionary to introduce a slight change in the way a word is used. The particular change involved is explained immediately after the symbol.

9.2 It can introduce a slight change in meaning. For example, an adjective that usually describes people may also be used to describe their behaviour, or a noun that refers to a container may also refer to its contents.

bucket ... **1** A **bucket** is a container which is shaped like a cylinder and which has an open top and a handle. Buckets are often used for holding and carrying water. EG *The hotel cleaner entered carrying a bucket and a mop.* ▶ **Bucket** is also used to refer to the amount of liquid which a bucket contains. EG *... a bucket of warm water.*

9.3 It can introduce a change in the grammar of the word that has little or no effect on its meaning. For example, a word that is most commonly used as a verb may also be used as a noun referring to the action that the verb involves.

giggle ... If you **giggle**, you make quiet and repeated laughing noises, because you are nervous or embarrassed. EG *The absurd sound made her giggle... 'Oh dear,' she giggled, 'I'd quite forgotten'... giggling helplessly at her own joke.* ▶ used as a noun. EG *... a nervous giggle... We had a good giggle about that.*

9.4 The change may involve a count noun that can also be used as an uncount noun.

rope ... **1** A **rope** is a piece of very thick, strong string, usually made of several strands of hemp ... EG *One of the characters in the play hangs herself with a rope... She picked up the end of the rope, and pulled with all her might.* ▶ used as an uncount noun. EG *...a piece of rope.* N COUNT ▶ N UNCOUNT

9.5 The change may involve the frequent use of a noun before another noun as if it were an adjective.

background ... **2** The **background** to an important event or situation consists of the facts that help to explain what caused it, why it happened in a particular way or at a particular time, etc EG *...the economic background to the present political crisis...* ▶ used as an adjective. EG *...background information.*

10 The use of ◇

10.1 Derived words can appear within an entry in small bold letters after the symbol ◇. They are words which are formed from the entry word by the addition of a suffix, according to rules that apply very generally in English. The words formed in this way are usually very similar in meaning to the entry word or to the particular meaning of the entry word in the paragraph or sub-paragraph in which they are placed. In such cases, there is no separate entry for the derived word.

touchy ... **1** A **touchy** person is easily upset, offended or irritated. EG *He always was a touchy and quick-tempered man... They are touchy about criticism.* ◇ **touchiness**. EG *She was amused by his touchiness.*

10.2 Derived words include for example, adverbs that are formed from adjectives by adding -ly (eg. bravely from brave) or nouns that are formed from verbs or adjectives by adding -ing, -ness, -ity, -tion, etc. Grammatical information about all such words is given in the extra column.

adamant ... If you are **adamant** about something, you are determined not to change your mind about it. EG *The government remains adamant that it will not yield to pressure* ... ◇ **adamantly**. EG *They are adamantly opposed to continued high U.S. interest rates.* ADJ CLASSIF ◇ ADV WITH VB

10.3 However, where a derived word is very common or has a different meaning from the entry word from which it is formed, it is given as a separate entry at its correct place in the alphabetical order.

11 The use of ●

11.1 The symbol ● is used to introduce two different types of information: phrases or expressions and cross-references.

11.2 **Phrases or expressions** are groups of two or more words, including the entry word, that occur regularly in a particular combination which has a very different meaning from that of the entry word by itself. The main words of the phrase or expression are in bold letters.

11.3 They are usually placed at the end of a paragraph or sub-paragraph if they are very close in meaning to the meaning explained in that paragraph.

sailor ... A **sailor** is a person who works on a ship as a member of its crew. EG *He had been a sailor in the Italian navy.* ● If you are a **good sailor**, you are able to travel on a boat in rough weather without being seasick. EG *I thought you were a good sailor.*

11.4 If a phrase or expression is very frequently used, or is not very close in meaning to any other uses, it may be explained in a separate paragraph.

11.5 If there are many phrases or expressions at one entry, they are often grouped together in one paragraph at or near the end of the entry.

bag ... **8** The word **bag** is also used in the following expressions in informal English. **8.1** If you say that something is **in the bag**, you mean that you are certain that you will get it or achieve it. **8.2** If you **pack** your **bags**, you leave a place where you have been living. EG *I decided it was time to pack my bags.* **8.3** If you are thrown out of a place **bag and baggage**, you are made to leave and take all your belongings with you ...

11.6 **Cross-references** indicate that more information about a word will be found at another entry, which is shown in bold letters immediately after the word 'See' or the words 'See also'.

attack ... **7** An **attack** of an illness is a short period in which you suffer badly from it and cannot control it. EG *I had an attack of giddiness... She had been left totally deaf by an attack of smallpox.* ● See also **heart attack**.

11.7 Cross-references may also indicate that a phrasal verb has a noun or adjective derived from it, which will be found as a separate entry.

break in ... **1** If someone **breaks in** or **breaks into** a building, they get into it by force ... ● See also **break-in**. PHRASAL VB: V + ADV/PREP

break-in ... A **break-in** is the act of getting into a building by force... N COUNT

11.8 If there are several cross-references from one entry to other entries in this dictionary, they are grouped together in one paragraph at the end of the entry, after the phrases or expressions and before the phrasal verbs (see 12).

land ... **16** If someone **lands** on their feet, they are lucky and successful after being in a difficult situation.
17 See also **landed**, **landing**. ● **the lie of the land**: See **lie**. ● to **see how the land lies**: see **lie**.
land up. if you **land up** in a place or situation, you ...

12 Phrasal verbs

12.1 Phrasal verbs are items which consist of a verb and an adverb, a preposition or both and which have a separate meaning, often very different from the meaning of the verb by itself or with other prepositions and adverbs.

12.2 Phrasal verbs are placed at the end of an entry. Two or more phrasal verbs in the same entry are placed in alphabetical order within that entry.

12.3 A phrasal verb is printed in large bold letters like an entry, but is not placed at the left-most margin.

bring ... **1** When you **bring** someone or something ...
23 If something **brings** a particular price, it can be sold for that price ...
24 ● to **bring** something **into being**: see **being**. ● to **bring the house down:** see **house.**
bring about. To **bring** something **about** means to cause it to happen ...
bring along. If you **bring** someone or something **along**, you bring them with you when you come to a place ...
bring-and-buy-sale ...
brink ...

12.4 Only one form is given for a phrasal verb, because the other forms will always be the same as for the main word of the entry at which they occur.

12.5 Sometimes, if two phrasal verbs have the same meaning or meanings, they are explained in the same place. If the two phrasal verbs would normally be next to each other in the alphabetical order, the second one is not given a separate entry.

mess about ... **1** If you **mess about** or **mess around**, **1.1** you spend time doing things without any particular purpose or plan ... EG ... *talking, playing, messing about together... Some of the lads had been messing around when they should have been working...* **1.2** you interfere with things in a harmful way; used showing disapproval. EG *She didn't want you coming and messing about with things.* **1.3** you behave in a joking, teasing or silly way. EG *Stop messing about! I'm trying to tell you something important.*

2 If you **mess** someone **about** or you **mess** someone **around,** you treat them badly for example by not being honest with them, or by continually changing plans which affect them. EG *You've been messing me about all summer and I'm fed up with it.*

13 Extra column

13.1 The extra column in this dictionary is used to give two different types of information: grammar notes and semantic relationships.

13.2 **Grammar notes** are given in abbreviated form in capital letters with some symbols such as + and /. A full list of words used in the notes and an explanation of the symbols is given on page xiii.

abdominal ... is used to describe something that is situated in the abdomen or forms part of it. EG *They suffered abdominal pains.* — ADJ CLASSIF:USU ATTRIB

absorb ... **1** If something **absorbs** a liquid or gas, it soaks it up or draws it in ... — V + O

accomplice ... Someone's **accomplice** is a person who helps them to commit a crime or to do something wrong. EG *She was betrayed by her accomplice.* — N COUNT:USU POSS + N

13.3 Each grammar note is explained inside a box at its correct place in the alphabetical order of the dictionary.

ad infinitum ... If something happens or goes on **ad infinitum**, it is repeated again and again in the same way. EG *She then teaches it to her daughter, and so on ad infinitum.*

ADJ □ in this dictionary ADJ is used in the grammar notes beside entries to mean 'adjective'. For explanations of different kinds of adjective see □ at ADJ AFTER N, ADJ CLASSIF, ADJ COLOUR, and ADJ QUALIT. See also □ at ATTRIB and PRED.

adjacent ... If something is **adjacent** to something else...

13.4 Sequences of letters and symbols that occur frequently are also explained at their correct place in the alphabetical entry list of the dictionary, ignoring any symbols.

V-necked ...
V + O □ ...
V + O + A □ ...
VOC □ ...
V + O + C □ ...
vocabulary ...

13.5 Words that appear in italics in the grammar notes indicate that they are the words most commonly used with the entry word in a particular grammatical structure.

disadvantageous ... Something that is **disadvantageous** is harmful or likely to cause problems for you. EG *These factors made the 1976 agreement disadvantageous to the British.* — ADJ QUALIT: IF + PREP THEN *to*

13.6 **Semantic relationships**: Words that appear in the extra column after the symbols ⇑ = and ≠ are semantic references. They offer users similar or opposite words for the word that is being explained.

13.7 The symbol ⇑ indicates that the following word has a more general meaning similar to the entry word or a particular use of the entry word. Such a word is called a superordinate.

automobile ... An **automobile** is a car; used especially in American English. — N COUNT ⇑ vehicle

13.8 The symbol = indicates that the following word is a synonym, and so is very similar in meaning to the entry word or use and can often be used instead of it.

assiduous ... Someone who is **assiduous** works hard or does things with care and dedication. EG ... *an assiduous student* ... — ADJ QUALIT = diligent

13.9 The symbol ≠ indicates that the following word is an antonym, and so is often used with the opposite meaning to that of the entry word or use.

badly off ... **1** If you are **badly off** for something that you need or want, you do not have enough of it. EG *The school is really quite badly off for books.* — ADJ QUALIT: PRED, USU + *for* ≠ well-off

amateur ... **1** An **amateur** is someone who does something such as acting or playing a sport as a hobby and not as a job. EG *It's a business for professionals not amateurs* ... — N COUNT ≠ professional

14 **Usage**: In this dictionary we have employed a variety of strategies to indicate when a word is mainly used by a particular group of people or in a particular social context, or is used in order to convey an attitude or opinion of someone or something. This information has been placed at different points in the entries depending on its importance when using the word, although normally it comes after the explanation of meaning.

ostracism ... is the state of being ostracized or the act of ostracizing someone; a formal word.

bathroom ... **2** Some people say **bathroom** as a polite way of referring to the toilet; used especially in American English. EG *Can I go to the bathroom please?*

acquisitive ... Someone who is **acquisitive** is fond of getting new possessions; used showing disapproval. EG *He's a very acquisitive sort of person.*

after ... **21** Some British people refer to the pudding course of a meal as **afters**; an informal use. EG *What's for afters?*

bathe ... **2** In American English, to **bathe** means to have a bath. EG *After golf I would return to the flat to bathe and change for work.*

bathos ... is a sudden change in speech or writing from a serious or important subject to a ridiculous or very ordinary one; a technical term in literary criticism.

Pronunciation

In this dictionary a guide is given to the pronunciation of the English words using the International Phonetic Alphabet. The accent represented is Received Pronunciation, or RP for short, which is a special type of Southern British English. There are several other accents of English, but RP is perhaps most widely used as a norm for teaching purposes.

Two kinds of information are needed if a word is to be properly pronounced: we need to know about each of the sounds that make up the word, and we need to know about stress. In each of the pronunciations shown in this dictionary, at least one vowel symbol is in heavier type and underlined. Sometimes more than one vowel is in heavier type:

result /rɪzʌlt/
disappointing /dɪsəpɔɪntɪŋ/

Heavy type and underlining signifies stress when the word is spoken in isolation. If two syllables are marked in this way, the second has primary stress while the first has secondary stress; if only one is marked, it has primary stress. A word spoken in isolation is called the citation form.

There is a more varied pattern of stress when the word is used in context. Quite commonly one of the stresses found in the citation form, or even both or the stresses, will be absent. The one-stress or two-stress patterns of English speech are associated not with individual words but with the information units that a speaker constructs:

The result was disappointing
/ðə rɪzʌlt wəz dɪsəpɔɪntɪŋ/

A disappointing result
/ə dɪsəpɔɪntɪŋ rɪzʌlt/

Very disappointing indeed
/veri¹ dɪsəpɔɪntɪŋ ɪndi:d/

This information cannot be given in advance in a dictionary.

If a vowel is shown in heavy type, this indicates not only its role in being able to take stress, but also something about the way in which it is pronounced. Any vowel marked in heavy type and underlined is a protected vowel. This means that there is very little variation in the way in which a speaker pronounces it, whether or not it actually gets a stress in the information unit in which it occurs. In /sɪti¹/ (city), the protected vowel /ɪ/ is unvariable within the chosen accent, but the unprotected vowel /i¹/ can vary between /ɪ/ and /i:/ in the usage of a single speaker.

In many cases, the amount of variation is negligible. Where it is not, where an unprotected vowel can range over several different sounds, there are small superscript numbers printed just above and beside the vowel symbol. The numbers indicate the range of likely variation. So, for example, /ə¹/ means variation between /ə/ and /ɪ/ as in /sɪnə¹mə/ (cinema); /ɪ²/ means variation between /ɪ/ and /ɛ/ as in /ju:slɪ²s/ (useless).

Some sounds, both vowels and consonants, are heard only in rather slow and careful speech. /ju:ʒʊəl/ (usual) and /kɒləmnɪst/ (columnist) are often heard as /ju:ʒəl/ and /kɒləmɪst/. In such cases, the superscript ⁰ indicates variation between full pronunciation of the sound and no pronunciation:

/ju:ʒʊ⁰əl/, /kɒləmn⁰ɪst/

All superscripts and the variations that they stand for are given in the key below.

Pronunciation Key

Symbols Used

ɑ:	heart, start, calm.	b	bed	t	talk
æ	act, mass, lap.	d	done	v	van
aɪ	dive, cry, mind.	f	fit	w	win
aɪə	fire, tyre, buyer.	g	good	x	loch
aʊ	out, down, loud.	h	hat	z	zoo
aʊə	flour, tower, sour.	j	yellow	ʃ	ship
ɛ	met, lend, pen.	k	king	ʒ	measure
eɪ	say, main, weight.	l	lip	ŋ	sing
ɛə	fair, care, wear.	m	mat	tʃ	cheap
ɪ	fit, win, list.	n	nine	θ	thin
i:	feed, me, beat.	p	pay	ð	then
ɪə	near, beard, clear.	r	run	dʒ	joy
ɒ	lot, lost, spot.	s	soon		
əʊ	note, phone, coat.				
ɔ:	more, cord, claw.				
ɔɪ	boy, coin, joint.				
ʊ	could, stood, hood.				
u:	you, use, choose.				
ʊə	sure, pure, cure.				
ɜ:	turn, third, word.				
ʌ	but, fund, must.				
ə	the weak vowel in butter, about, forgotten.				

Superscripts

ə⁰	(ə ⇔ 0)	ɪ⁰	(ɪ ⇔ 0)
ə¹	(ə ⇔ ɪ)	ɪ¹	(ɪ ⇔ ə)
ə²	(ə ⇔ ɛ)	ɪ²	(ɪ ⇔ ɛ)
ə³	(ə ⇔ æ)	ɪ³	(ɪ ⇔ eɪ)
ə⁴	(ə ⇔ ʊ)	ɪ⁵	(ɪ ⇔ aɪ)
ə⁵	(ə ⇔ ɜ:)	i¹	(ɪ ⇔ i:)
ə⁶	(ə ⇔ əʊ)	ɛ¹	(ɛ ⇔ ɪ)
ə⁷	(ə ⇔ ɒ)	u⁴	(u: ⇔ ʊ)
ə⁸	(ə ⇔ ɔ:)	m¹	(m ⇔ n)
ə⁹	(ə ⇔ ʌ)	ŋ¹	(ŋ ⇔ n)

⁰ after a consonant symbol indicates probable omission; k⁰, t⁰, h⁰, etc.

Special Entries

Below is a list of all the special entries contained in this dictionary. The special entries explain how to read the grammar notes in the extra column.
The following punctuation symbols are used in the grammar notes.

, A comma is used to show that two or more word classes are listed within the same grammar note, when all of them apply to the same paragraph or subparagraph. The comma separates the classes, and the last class is introduced by OR. For example, V, V+O, OR V+REPORT-CL means that the verb may be used in three ways: it may occur without an object, it may occur with an object, or it may occur with a report clause.

: A colon is used to introduce extra information after the basic word class has been stated. For example, ADJ CLASSIF: ATTRIB means that the classifying adjective is used in front of a noun.

/ A slash is used between two alternatives in the grammar notes. For example, N COUNT/UNCOUNT means that the noun can be used as either a count noun or an uncount noun. V+O: IF+PREP THEN *with/against* means that if there is a preposition after this verb structure, the preposition is normally *with* or *against*.

() Brackets are mainly used in the grammar notes beside verbs. They show that a particular sort of object or adjunct is used. For example, V+O(REFL) means that the object of the verb is a reflexive pronoun. V+O(NG/REFL) means that the object of the verb is either a noun group or a reflexive pronoun. V+A(*to*) means that the verb is followed by an adjunct that begins with the preposition *to*.

\+ A plus is used in two ways. With verbs, it is used to show that the verb occurs with an object (V+O) or an adjunct (V+A). With other words, it is used to show that the word is followed by a particular item. For example, ADV+ADJ/ADV means that the adverb is typically followed by an adjective or another adverb.

The following words are also used in the grammar notes.

USU means 'usually'. For example, a verb with the grammar note V+O: USU PASS is usually but not always used in the passive.

ONLY is used to report that we only have evidence showing that the word is used in this particular way. For example, V+O: ONLY PASS means that we have only found the verb used in the passive.

ALSO is used to mention an additional or alternative grammatical use. For example, N COUNT: ALSO IN TITLES means that a count noun can also be used as part of a title.

BEFORE and AFTER are used to show the normal order in which the grammatical items occur. For example N BEFORE N means that the noun is used in front of another noun; ADV AFTER VB means that the adverb is used following a verb.

WITH is used to say that a word normally occurs in company with a word from a particular class of words, which may occur before or after it. For example, ADV WITH VB means that the adverb normally occurs in company with a verb.

Introduction

The COBUILD Dictionary

This dictionary is for people who want to use modern English. It offers accurate and detailed information on the way modern English is used in all kinds of communication. It is a useful guide to writing and speaking English as well as an aid to reading and understanding.

This dictionary looks rather like most others if you don't look too closely. Actually it is quite new and different. The techniques used to compile it are new and use advanced computer technology. For the user the kind of information is different, the quality of information is different, and the presentation of the information is different.

For the first time, a dictionary has been compiled by the thorough examination of a representative group of English texts, spoken and written, running to many millions of words. This means that in addition to all the tools of the conventional dictionary makers - wide reading and experience of English, other dictionaries and of course eyes and ears - this dictionary is based on hard, measurable evidence. No major uses are missed, and the number of times a use occurs has a strong influence on the way the entries are organized. Equally, the large group of texts, called the corpus, gives us reasonable grounds for omitting many uses and word-forms that do not occur in it. It is difficult for a conventional dictionary, in the absence of evidence, to decide what to leave out, and a lot of quite misleading information is thus preserved in the tradition of lexicography.

This dictionary makes a break with such traditions. We have gone back to basics and collected many millions of words, and put them into a very large computer. The dictionary team has had daily access to about 20 million words, with many more in specialized stores. The words came from books, magazines, newspapers, pamphlets, leaflets, conversations, radio and television broadcasts. The sources are gratefully acknowledged on page xxii. The aim was to provide a fair representation of contemporary English.

No set of texts, however large, can be fully relied on; all the time the information from the texts has been analysed and appraised by a team of lexicographers, whose professional knowledge has also been used wherever there is only a small amount of evidence of the usage of a word or phrase.

The quality of information in this dictionary is different from others. With our textual evidence it is possible to be precise about the shape of phrases and the extent of their variation; the relative importance of different senses of a word; and the typical environment in which a word or phrase is used. Even when statements like this are already familiar, they are made with a different kind of authority in this book.

Examples

Because of this opportunity to show the actual language to users of it, the examples in this dictionary have a new status and do a different job from examples in the conventional tradition. These examples are taken from actual texts wherever possible.

The use of 'citation' from actual texts is a noble tradition in lexicography. You will find cited examples in Dr Johnson's famous Dictionary of 1755 and in the Oxford English Dictionary begun by Murray in 1878. In the development of language teaching materials, however, in recent years it has become a habit to make up examples to illustrate a particular usage.

These examples have no authority apart from the thoughts of the person who creates them and they are very often quite unnatural. It is frequently difficult to imagine where they might be used in everyday speech and writing.

This language tradition has spilled over into the dictionaries that are specially written for language learners. However, in this dictionary we return to the well-established practice of selecting examples from actual instances.

Some of the examples are slightly adapted from the citation in our text files. In all cases we have attempted to preserve the common pattern of use, and have only changed or omitted words that seemed to us not to be affecting the use. The length of examples is critical in a dictionary that includes so many and, inevitably, some of them have been shortened. Occasionally also an example has been edited to make it easier to understand when it is removed from its context. Only on very rare occasions have we composed an example because there is no suitable one in the corpus.

The user can thus be confident that the examples display the language as it is used. Not only that, but the examples printed are typical of usage. A selection is normally made after a comparison of dozens of examples, and in the case of everyday words, hundreds or thousands.

We expect these examples to do a quite different job from invented examples; something more like the job done in Dr Johnson's dictionary and the OED. They are examples of good practice. They support the explanations and they illustrate usage. They provide a reliable guide for speaking and writing in the English of today.

In contrast, invented examples are really part of the explanations. They have no independent authority or reason for their existence, and they are constructed to refine the explanations and in many cases to clarify the explanations. They give no reliable guide to composition in English and would be very misleading if applied to that task. They do not say 'This is how the word is used', but rather 'This will help you to understand the sense'. We are so accustomed to invented examples that we often forget that they are only of value in helping to explain. Usage cannot be invented, it can only be recorded.

In this dictionary the examples show how the words are used, and in addition, of course, they give help in understanding the sense.

We expect that the user will find the examples interesting and sometimes unusual. They occasionally contain difficult words and phrases and they may sometimes illustrate uses and senses which seem slightly different from the explanations. This is because the examples in this dictionary give independent information about the language, sometimes extending what it is possible to write into

the explanation. Extensive testing has convinced us that users appreciate examples of this kind, that they become accustomed to using them. In the first place examples from real usage are primary evidence and complement the secondary evidence of the explanation. In the second place, the open-ended nature of these examples, the way in which they are taken from the vast repertoire of English, give the student a feeling of genuine access to the language, including some of those more untidy and difficult aspects.

The examples are thus a major feature of this book and we hope that their richness and variety will be extensively used, and that their function will be fully understood and appreciated.

Style of Presentation

It is a principle of this dictionary that it should be easily understood by the learner for whom it is designed. Obviously, if the style of a dictionary is too difficult or too condensed for users, the work is useless.

This dictionary also breaks with a long-established tradition in the style in which the entries are written. Over the years, originally for reasons of space, dictionaries have established dozens of stylistic conventions, which require to be learned in addition to learning the everyday language before the dictionary can be fully understood.

The compilers of this dictionary have considered each convention carefully, and rejected all but a few of them because of the trouble they cause. Those that are left represent what we believe to be the minimum consistent with economy and clarity. The dictionary is designed to read like ordinary English. Words appear in their normal full spelling forms and the explanations are written in real sentences. Great care has been taken to word the explanations in natural, straightforward English so that they are comprehensible to every user.

The word being explained is normally mentioned in the explanation in such a way that you can see how it is typically used in English.

For example: **throw 18** If you **throw** a fit or tantrum, you suddenly lose control of yourself or your emotions.

In many cases, the explanation provides an illustration of the word in its typical grammatical context. This is thought to be more useful than an attempt to account for the meaning of the word in isolation.

The wording of each explanation shows the basic word class. So, the entry for an ordinary count noun like *door*, will begin, 'A **door** is ...'

An entry for a transitive verb like *conceal* will begin, 'If you **conceal** something, you ...' This suggests that the verb in this sense is typically used with a human subject and a wide range of direct objects, which are typically inanimate or abstract rather than human.

Variations of this style show variations in the typical range of grammatical subject and object. An explanation that begins, 'To **sink** a ship means to ..' implies that the range of typical subjects is very wide indeed - including both humans and inanimate objects - but that the range of direct objects for this sense is restricted to ships and things like ships.

In these explanations, the words 'if you say that...' very often signal metaphoric, figurative, and other non-literal meanings.

For example: **glue 4** If you say that someone's **eyes** are **glued** to something, you mean that they are watching it with all their attention.

In addition to this, particular emphasis has been laid on clear and systematic organization to make sure that the user finds the information required as easily and as quickly as possible. The dictionary text has been given an orderly layout, e.g. each new usage of the headword is marked by a number and a new line.

Typefaces were carefully chosen to obtain maximum readability.

Extra Column

The most noticeable departure from everyday English will be found in the extra notes at the side of each column. This is a new feature which has been added to increase the amount of systematic information given to the user.

The main entries are self-standing and it is never necessary to consult the Extra Column for everyday purposes. But this dictionary is designed for a wide range of users, including students and teachers who need quite a lot of technical information.

The main aim of the Extra Column is to provide the more advanced student with structural information, extending the statements of the main entry. It gives a word class, and indicates the range of syntactic uses. It points out typical syntactic patterns and choices available to the user of English, often going beyond what it is possible to give in examples.

One important reason for creating the Extra Column is to keep the main dictionary text simple and accessible. We did not want to keep interrupting the flow of entries with abbreviations and technical terms.

The terminology used here is fairly easy to understand and the statements give detailed information which would be too lengthy to include if it was written out fully. It is hoped that the conventions of the Extra Column will be quickly mastered by post-intermediate students, thus adding to the value of the dictionary. The terms used in the Extra Column are explained in the dictionary and you will find the entries in normal alphabetical order. For example, there is a full explanation of SUPP between *supine* and *supper*. It has a box drawn round it to make it easy to find.

In addition, there is a quick reference guide on page xiii.

The Extra Column puts the words and phrases into categories. For example alongside sense 22 of *back* is the code N COUNT + SUPP. It is fairly easy to see that this means that *back* can be used as a count noun, and the noun group which it heads will normally have a supplement, and *a back* is not likely to appear on its own. If you are not sure what is meant by a count noun, then look up the special entry at N COUNT; if you want to know more about supplements, look up the special entry at SUPP. More examples are given in the special entry to tell you the range and variety of supplements and the typical nouns that take them.

So the Extra Column contains a large number of grammatical notes about individual words and senses. More than that, it draws attention to grammatical patterns which are common for that word in that sense. It is rare for grammar books to separate the patterns which actually occur from the ones which can in theory occur; it is also rare for grammars to be careful about relating the grammar to an individual sense of a word.

The Extra Column entries thus provide very substantial information which is otherwise difficult to record in a dictionary, but which is immensely useful for composing speech and writing in English. It is important, therefore to understand its function properly.

The Extra Column notes are written to apply only to the words alongside them. They are based on observation of the actual patterning of words and so they are intended to give guidance as to how the words can be used. The Extra Column does not constitute a grammar of English which can be separated from the rest of the dictionary because that would go well beyond the notes in a dictionary. It is a powerful aid and a support to the rest of the entry.

The main point to note is that a separate grammar would tell you what is, in principle, possible in the way of constructions. Such a grammar is not usually concerned with what actually occurs or is likely to occur. Grammars can produce structures which are quite correct, but which are not at all likely to be used. For example the verb *mightn't have been going to be tested* or the noun group *all seven of the very happy old brown grass-eating garden rodents*, are quite correct in grammar. But it is most unlikely that such complicated combinations would actually be used in a text.

The Extra Column of this dictionary contrasts very sharply with this sort of grammar. From all of the virtually endless combinations and permutations it picks out what is typical of the use of the word as found in the text collection. Hence the entries for apparently similar words or senses will only be identical if they are used in just the same way as each other. Apart from trivial variations in phrasing, which we have done our best to standardize, a marked difference in the Extra Column will probably indicate a difference of typical structure, of emphasis or frequency, or a noticeable tendency towards one pattern rather than another. Our policy is one of caution, so that the Extra Column entries should draw attention only to prominent features of the word in question.

As well as grammatical notes, we have included semantic information in the Extra Column wherever possible. Words of similar meaning (synonyms) and opposite meaning (antonyms) are noted, and more general words (superordinates) also. These allow meanings to be related to each other, so that the users can add to their vocabulary by making use of the dictionary.

Word and Environment

The most important result that has come from the work of preparing this dictionary concerns the way in which the patterns of words with each other are related to the meanings and uses of the words. However, it is difficult to show such patterns clearly in a dictionary. Every dictionary is based on an alphabetical list of words, and such an organization may lead people to believe that the senses of a word can be explained and illustrated without reference to other words. That is occasionally the case. Overwhelmingly, however, the sense of a word is bound up with a particular usage - a syntactic pattern perhaps, or a close association of words or a grouping of words into a set phrase. It is not really possible to talk about the meaning of the word in isolation - it only has a particular meaning when it is in a particular environment.

Some common words have very little independent meaning - the word *bet*, for example. The commonest use of *bet* is with *I* in front of it (often a modal verb between them), and it is used to add conviction to a statement a person is making: *I bet nobody's been here before*. If, however, the pronoun *you* appears in front of *bet* (without a modal and as a whole sentence) it is used as an enthusiastic response: '*Are you going to go?*' - '*You bet!*'

Several nouns are frequently qualified by the adjective *hard*. We talk of *hard luck*, *hard facts*, and *hard evidence*. We can also talk about *strong evidence* but are unlikely to use 'strong facts' or 'strong luck'; *tough luck* but not 'tough facts' or 'tough evidence'; *sad facts* but not 'sad luck' or 'sad evidence'. Of course, it is always possible to depart from the normal patterns of English, so it is not claimed that 'sad evidence' cannot occur - just that it's not worth following as a pattern.

Note that in the above examples of *hard*, there are two rather different meanings. In *hard luck*, *hard* means 'unfortunate', but in *hard facts* and *hard evidence* it means 'unlikely to be proved wrong'. Despite this, the patterns of collocation show that the near-synonym *strong* goes only with *evidence*. So the patterns of collocation are not governed by meaning.

The dictionary offers a lot of help in making this area clear. The style of explanation is equally capable of presenting single words or phrases, and can give alternatives. The examples pay careful attention to collocation and typical phrasing. The Extra Column is often useful for stating the limits of a usage, and its typical features; it may give a syntactic pattern that always, or nearly always, carries the usage; or it may point out that one preposition in particular is used, and no other, or that a usage is normally passive.

In addition to these features, the dictionary also uses cross references to help you find a usage that consists of more than one word.

Common Words

This dictionary makes a feature of the very common words of the language and pays them very close attention. Much more space is devoted to them than in any other dictionary of a similar size. Every dictionary has entries for the very common grammatical words of the language like *the*, *and*, *of*. However, we do not think that users find these entries very helpful. They are difficult to understand and they are attempts at arrangements by meaning rather than usage. It is clear from COBUILD research that the very common words in English have most of their usage in the sort of patterns just discussed in the previous section. The information needed to understand such words is largely found by studying their usage rather that their semantic content. Most dictionaries do not record usage in a way that brings this out.

This dictionary presents and explains the uses of these words in special ways. This makes them prominent and might cause some people to wonder why such an emphasis is put on words that are often called 'purely grammatical', 'empty', etc. There is an issue of principle here which we believe to be most important.

First of all, consider some basic facts about how often words occur in people's use of English. Studies of the way in which words occur in texts all come up with the same basic message: most actual usage is of frequent words. A relatively small number of words account for a very large percentage of what is written and spoken every day.

The following occur about once in every hundred thousand words: *secretly*, *jet*, *core*, *agony*, *preparation*, *privileged*.

The following are typical of words that occur about once in every ten thousand words: *speak*, *green*, *maybe*, *quickly*, *sorry*.

The following are typical of words that occur about once in every thousand words: *two*, *over*, *get*, *because*, *see*, *don't*.

Words like these occur about once in every hundred words: *in*, *that*.

A few words occur even more frequently, for example: *the, and, of.*

So in most texts that you will read, or in talks you will hear, or in conversations you will have, about three words in every four are the common ones.

These facts have been known for over fifty years, but their significance has been overlooked. This book provides detailed information about common words and their use in conjunction with other words. It does not give very rare and unusual words. These words of low frequency are interesting in themselves, but we have concentrated on language which will be of direct use to those wanting to write or speak good English.

The importance of very frequent words is not confined to the 50 or 100 commonest. The same features show in the top 2000–3000 words – those of great usefulness and complex usage, with a strong tendency to form patterns with words about them. They are the power-house of the language. Fluency in using these words is of much more value than knowing all sorts of peculiar words that are hardly ever used.

Over the decades various attempts have been made by scholars and educationalists to establish and define a 'basic English' that would make international communication easier and more effective. Whenever you restrict people who have a command of a language, they will rebel; whenever you distort their language, you will be ignored. Now we have the facts which enable us to select and describe the core of the language. In the treatment of common words in this book there is an invitation to devise your own basic English.

The Word List

Which words, then, should we put in a dictionary? The first answer, that most lexicographers will applaud, is 'as many as possible'. But there are still a number of different ways to organize the words. A dictionary for use in producing language and in communication in general, will pay attention to the statistics given above. The common words are very important. What is more, our research shows that the common words have many different patterns of use, and a subtle range of meanings. The simplest words for the lexicographer are the not very common ones with just one clear meaning, like *jabber, jackal, jackass, jackdaw* and *jacuzzi*.

This dictionary takes on the job of making a useful, readable and reliable description of the central core of the language. The book as a whole is big enough to ensure that, despite this, the less common vocabulary is not neglected, and there is information here on over forty thousand words. But do not look here for obsolete or dialectal or highly technical words. This dictionary is designed for everyday use.

It follows from this that if your English is already quite good, the information given in this book will often confirm what you already thought was likely. That is a most important function - just as important as informing you of something you had no idea about. How often do you turn to a dictionary to learn something utterly new? Anyone who can understand this Introduction or use the dictionary at all is already quite good at English. But for a number of reasons, you may seek reassurance that a word means what you think it means, or that a construction is made in one way rather than another. A language is capable of a great range of variation from the main patterns, but nevertheless has some underlying strict rules, and both the rules and the main variations can be got from these pages.

So this book is offered in part as a valuable way of bringing to your attention things that you were vaguely aware of anyway; of formulating them and clarifying areas of doubt concerning the limits of their use; of giving support and confidence in modern English usage. You will often find what you want by noticing an example that is close to your needs, or by skimming down the Extra Column for the sort of pattern you are interested in.

You may come across a sentence like *That is what we need so badly*, and you may feel sure that the usual meaning of *bad* is not appropriate. You get the strong impression that it is just being used to intensify the meaning of *need*, and the word *so* is often used in a meaning close to *very*. When you look up the dictionary, which says 'If you need or want something **badly**, you need or want it very much', you find you were correct, and the dictionary has helped you to make sure, and to give you more confidence in using it in your own speaking and writing.

Do not undervalue this function of the dictionary. Users of a language are not necessarily accurate reporters of usage, even their own. Most of our skill in using language is unconscious, and therefore difficult to recall, though easy to recognize. This is a surprising point, and very easy to test out in any language. Just take an ordinary piece of writing, and ask someone to read out any two consecutive words. Try to guess the next word. Usually you will not manage to guess it exactly, but when it is eventually read out it will usually fit in perfectly with the rest of the text.

Apart from the function of confirming our guesses, the dictionary offers a large amount of new information to any user. This will extend and improve usage and understanding, and help learners to use the language more skilfully.

Meaning and Function

Words and phrases *do* things. People apologize, invite, insult, mollify, persuade, and a hundred other things using words. Quite often a function of this kind is associated with a particular word or phrase, and in this dictionary we try to draw attention to such functions. They are just as important as the meanings.

In the case of phrases, it is sometimes difficult to record these in an alphabetical dictionary. Many groups of common words like *by the way, for one thing*, do not contain an obvious word for indexing purposes, and there is no terminology in common use. Nevertheless we have tried to present all the main phrases that have a function associated with them.

Those words which have a specialized function in conversation or writing are noted in the same way as meanings. So for example **better 8**, as in '**you'd better** make some notes' is said to be a polite way of telling, advising, warning or threatening people. Another example is *no kidding* which, in informal spoken English, is used to emphasize that what you are saying is true.

Many such functions have to do with organizing the discourse. For instance, there are markers of boundaries in conversation, like *right, now, okay*: *Right, I'm going to talk this afternoon about (fire hazards)...Okay, I think we'll stop there...Anyway, so much for modern art.*

If you want to make what you are saying sound less definite, forceful, or dogmatic, and therefore more acceptable to your audience you can use a phrase like *I don't know*, which you find at **know 20.2:** *I don't know*

about you, but (I didn't like it at all)... I don't really know how to put it, it's not really an arts subject.

You could also use a fixed expression like *all things considered: He's okay, all things considered.*

There are lots of ways in which we emphasize the points that we make. Some common adverbs are used like *very* in: *they treated me very badly.*

Some fixed expressions are also used to emphasize what you are saying,like *here and now*, **here 11**: *I'll say here and now that I don't believe in ghosts.*

Another useful function is to draw the attention of the hearer or reader to what you are about to say. For example, **as 14** refers to phrases like *as for myself: As for myself, I had a glass of juice three times a day.*

Very general nouns such as *thing* or *aspect* are often used to indicate to the hearer that you are about to mention something more specific: *The other thing of course is that people never take him seriously... Far and away the most important aspect is the person's disposition.*

This dictionary pays particular attention to the functions of words and phrases, giving thousands of examples of the kinds of functions that have just been illustrated.

Organization of Entries

Dictionaries vary a lot in the way in which an entry is put together. This dictionary follows a simple principle of trying to make it easy for users to find what they want. So longer entries are divided up into sections and paragraphs, and phrases are gathered together at the end of a section. There are detailed notes on the organization on page viii.

To begin with, the entry contains information on the spelling, pronunciation and inflection of a word. All the different inflectional forms are listed. Then the first sense is given.

Wherever possible the first sense is a common one, and a fairly easy one - usually the sense that most people would expect. Unlike other dictionaries, this one is written in the knowledge of which are the common senses or usages, and this is taken into account. But because the commonest meaning is often not a clear and independent one, it is not always put first.

For example, about half the examples in the corpus of *bet* are of the sense numbered 3. There are not nearly as many examples of the senses 1 or 2, which are to do with risking money on a chance. But these senses are felt to be the ones to begin a description with. It is easy to identify the central, core meaning of a word. Most people who know the language well will agree that there usually is such a meaning and they will probably agree which it is - regardless of how frequent it is.

Another factor that we paid attention to is the contrast between abstract meanings and 'concrete' ones, denoting physical objects and events. Wherever it seemed reasonable, we gave preference to the concrete over the abstract because the concrete meaning is often easier to grasp, and abstract meanings can often be seen as variations on the concrete.

Some dictionaries put the earliest recorded meanings first, so that the present-day meanings are to be found much later in the entry. It should be said at once that this is not a historical dictionary; it is a description of what the language is like at the present time. The user is spared having to read through an account of earlier meanings and etymologies, and will not confuse old and new.

So in this dictionary the first sense is a common one and a central one; also an independent one and if possible it is concrete. The explanation shows what word class is typical of this sense. Then all the other usages of the same word class will normally follow. This organization avoids a lot of repetition because the same framework of explanation can be used again and again.

When the usage changes, so does the wording of the framework and there is a new paragraph. Again the usages are grouped. Examples follow each usage.

This organization means that where a word is used in the same sense but in different word classes, this sense will be given more than once. For example, **clot 1** is a noun, **clot 2** is a verb, and **clot 3** is another noun, quite different from **clot 1**.

Within each paragraph the different senses are grouped together as well as the word allows. Although the frequency of a sense is taken into account, the most important matter within a paragraph is the movement from one sense to another, giving as clear as possible a picture.

Words

A dictionary is organized by putting words in alphabetical order. In the main this is a simple task. There are, however, a number of problems affecting some unusual words and various combinations.

In general, we have stuck to strict alphabetical order of the written form of the word. When a word has more than one pronunciation, like *bow* or *absent*, this is noted at the beginning of the entry. Compounds, inflections or derived forms that merit a separate entry are given in their alphabetical place, and no account is taken of the hyphens or word spaces that are sometimes found in compounds. Phrases are recorded at the word we think the user will probably turn to first, but cross-referenced from other significant words. Technical terms about language, including the apparatus of the extra column, will all be found in alphabetical order, as will common abbreviations, weights and measures and many other items that sometimes appear separately in dictionaries.

What Kind of English?

Any dictionary in one volume, however large, has to make decisions about which words to include and which to exclude, which to mention briefly and which to concentrate on. It has already been pointed out (see Common Words, above) that this dictionary gives pride of place to the central core of the language. It is above all a guide to ordinary everyday English.

Technical Terminology

The texts from which this dictionary is derived are nearly all in ordinary everyday English, that any educated person might read or hear. The word list includes many hundreds of words which are technical in origin but which are regularly used in the central vocabulary - words like *hearsay, gynaecology, debug.* The meanings given are the meanings that are actually used in our ordinary texts and not necessarily what a specialist would say.

This is a tricky point; many words of technical origin in current use have highly specific meanings which are not really accessible to anyone who does not know the subject. They are explained, so to speak, within a scientific or humanistic discipline. If we just wrote out the 'official' explanation our users would hardly be helped at all. Most would have great

difficulty in understanding the explanation; if they managed to understand it they might very well find that is was being used by a non-specialist in a much more general sense.

Hence we have explained the technical words according to the way we use them in ordinary English, and we have kept the explanations as simple as possible. If you need a lot of technical terms, you can find them in the many specialized dictionaries that are compiled by experts in each field. There are also dictionaries with a large number of headwords like Collins English Dictionary.

Social Variety

The texts in our collection come from as wide a range of sources as possible, within what we feel is 'ordinary English'. Each text has to be about something, and we have taken account of the subject matter in every instance. Where the sense or usage seems to be restricted to a particular subject area, this is mentioned in the text. For example, *chromosome* is called a technical word and *clarion call* is called a literary expression.

On some occasions you will find an explanation that is not followed by an example. This often tells you that it is not a very important word. But sometimes it indicates that we do not recommend you to use it without assistance. It is there to help you in reading and understanding but there are difficult features of its usage which make it unsafe to use without further information.

We have also made recommendations on matters of formality, politeness and rudeness in English. It is the job of a dictionary to record the way a language is used, and we have done this.

Formality differs between spoken and written English. An expression which is quite normal in conversation might look very informal if it was written down; so *formal* and *informal* are just general guides, and you can use more informal English in speech than in writing.

Anything said to be rude, offensive, obscene or insulting should be treated with great care. Unless you are absolutely sure of how to use such words and phrases, you should avoid them. Users of English today are quite open and straightforward in their language, and will use words which would have shocked people only a few years ago. However, it is an area of usage where great skill and judgment are required for effective use. Nowadays sex and religion are often joked about in most social groups, but racist talk is very offensive, and sexist talk irritates some people.

Warnings are given whenever we feel they are necessary, so please be very careful to avoid these words and phrases.

Geographical Variety

English is the most widely used language in the world. It is the native and often the only language of people in Britain, USA, Canada, Australia, New Zealand and many other territories. It is the main second language of many Commonwealth countries and is learned to a high level by millions more people who do not use it in their immediate society, but need it because of their international connections in trade, research, politics etc.

A single volume cannot hope to do justice to the immense variety that is found in modern English. There are now whole dictionaries of regional varieties, like the Macquarie Dictionary of Australian English. But this dictionary, originating in Britain, inevitably tends towards a British variety of English. It tries to avoid British usages which are not international. Equally, aspects of American, Canadian or Australian English which are distinctive to these regions have been left out, but those which are familiar to the international community have been recorded. So *automobile* is said to be used especially in American English, but there is no restriction on *automat*. The result of this is a description of a form of English which is widely used and usable throughout the world.

Within Britain, there is a bewildering variety of accents and dialects, and again we have had to work out an appropriate policy for this dictionary. The principle we have followed is that a user of this dictionary will expect to have a statement about a word which is as simple and clear as it can possibly be made. There should be as few ifs and buts as possible. Hence we do not record all the variety, and more space is made available for words that can be used anywhere. There is a good range of specialist texts on accents and dialects of British English, so someone with a particular query can probably find the answer to it in a good library. In this book we try to describe a norm of usage which will be accepted as normal by large numbers of people.

There is a separate statement on pronunciation on page xii. The long tradition of English teaching throughout the world has settled on a so-called 'variety' of English called Received Pronunciation or RP. This may be felt nowadays as a slightly dated variety arising from an elitist view of a language, but it is still the best documented variety and entirely serviceable as a model.

Correctness

With regard to usage, correctness and related matters of style in the wording of the dictionary entries we have adopted a slightly conservative position. Many of the newer features of contemporary English may have a short life, and should not be given a place in the language that implies permanence. Many established features are not much used by younger people but are still thought to be available to most competent speakers. These are our judgments. We hope that the language presented in this book is above all reliable, not dated nor markedly avant-garde, nor unusual to the kind of person we think of as an average user.

Even this cautious reflection of modern usage will come as a surprise to many readers who are accustomed to following an older style of writing in English. For example, there is no attempt to avoid splitting infinitives. It is a regular feature of current speech and writing and we believe that it is now time to accept that the balance of usage is in favour of stylistic freedom in this instance. Also, we regularly refer to the indefinite pronouns such as *someone* by the words *they*, *them*, *their* because *he* and *she* are restricted to male and female referents respectively. We have abandoned the convention whereby *he* was held to refer to both men and women. This is done for several reasons; it is quite natural in speech; it is a very sensitive matter for those who have pointed out the built-in sexism of English; the 'singularity' of the indefinite pronouns is not as marked as the singularity of a common count noun.

These policies are representative of a number of small steps towards accepting some of the facts of everyday usage. We do not expect they will be welcomed by everyone, but would suggest that any who find them - as a whole - unacceptable are not really engaging with current English.

This brings up the question of usage and authority.

These concepts must support each other or no-one will respect either of them. If their close relationship breaks down, and authority is not backed up by usage, then no-one will respect it. It will be seen as unrealistic, arbitrary, old-fashioned and a barrier to free expression.

Similarly, no-one will respect usage if it is merely an unedited record of what people say and write. Unless they have the support of authority, people will be unable to distinguish between good and bad usage; it will not be possible to teach or use the language with any confidence. Those people - probably most of us - who get a general impression that the language is getting worse and worse as the years go by - will become quite upset if the whims and fashions of usage are not tempered by some yardstick or standard.

Any successful record of the language such as a dictionary is itself a contribution to authority. People tend to believe that dictionaries tell them what is or is not allowed in a language. Actually, the rules of a language are very flexible, but it is difficult to show all this in a dictionary. However much, in prefaces like this one, the editors may say they are only recording and following usage, there is no doubt whatsoever that they take thousands and thousands of decisions which contain an element of subjective judgment. And if they print new uses, the act of printing them in a dictionary seems to make them part of the language.

This dictionary has been compiled in the knowledge that it will be judged in the way just described. Hence the rather conservative stance. Sometimes in noting a usage we point out that a distinction has now been lost, or a rather pedantic convention has been abandoned. This is to help users who are expecting to find a usage which seems to have disappeared.

The Personality of a Dictionary

Much the same sort of remarks apply in general to the content of statements in this dictionary. Each dictionary presents a sort of corporate personality to the readership. Moral and political issues can be reduced to a minimum but cannot be entirely avoided. This is primarily a dictionary of the English language, and not a political document. Its position with reference to current English has been worked out with great thoroughness and a pooling of experience. Its position with reference to moral and political issues seeks always a neutral and fairly objective statement. It is certainly not intended to provoke.

We have tried at least to be consistent despite having a large team working for several years. We have tried to avoid extreme or sectarian positions, but we have taken note of the warnings in recent years that fairly ordinary use of language can be unconsciously sexist or racist or morally or politically offensive.

It is the hope of editors and publishers that this attempt to present senses in an uncontroversial fashion will be supported by readers writing in to point out places where they think it breaks down. In this way future editions can become more sensitive to public opinion.

Conclusion

So this is a very new and different dictionary, designed to be easy to use. The compilers have thousands of new things to say because of the unique view of English they have been able to get; at the same time they want to explain in simple and direct ways. We all hope that you, the user, will find it a genuinely helpful reference book.

Every effort has been made to trace the copyright holders, but if any have been inadvertently overlooked the publishers will be pleased to make the necessary acknowledgments at the first opportunity.

We would also like to thank Mr S Strategakis and Mr S Georgiades of the Strategakis Schools of Languages in Northern Greece for cooperation in allowing research in their schools into the use of dictionaries by learners.

Aa

A, a /eɪ/, **A's, a's**. **1** **A** is the first letter of the English alphabet. N COUNT

2 **From A to Z** means including everything or including a very large number of things. EG *You have to have everything from A to Z.* PHR : USED AS AN A

3 **From A to B** means from one place to another. EG *I just want a car that takes me from A to B.* PHR : USED AS AN A

4 **A**, in music, is the sixth note in the scale of C major. N COUNT/ UNCOUNT

5 If you get an **A** as a mark for a piece of work or in an exam, your work is considered to be extremely good. EG *She got three A's this week.* N COUNT/ UNCOUNT

6 **A** or **a** is also an abbreviation for various words beginning with A or a, such as 'acceleration', 'ampere', 'answer', and 'at'.

A □ In this dictionary A is used in the grammar notes beside entries to mean 'adjunct'. It is used in descriptions of verbs and descriptions of expressions. **1** It is used in descriptions of intransitive (V) and transitive (V+O) verbs that need to be followed by an adjunct. See □ at V+A and V+O+A. An example of a V+A is **behave**; an example of a V+O+A is **put**. EG *He behaved **in a very strange way**... They behaved **disgracefully**... I put the book **down**... He put the paper **in his pocket.*** **2** It is used in descriptions of expressions which function as an adjunct, see □ at PHR. Examples of PHR: USED AS AN A are **full blast** (see **blast 7.1**) and **of** your **own accord** (see **accord 2**). EG *A radio was going **full blast**... Mrs Taswell might tell you **of** her **own accord**... I left **of** my **own accord**.*

a, an. **A** or **an** is the indefinite article. It is used at the beginning of noun groups which refer to only one thing or person. The form **a** is usually pronounced /ə/, but it is pronounced /eɪ/ when you are emphasizing it. The form **an** is used in front of words that begin with vowel sounds. It is usually pronounced /ən/, but it is pronounced /æn/ when you are emphasizing it. **1** You use **a** or **an** at the beginning of noun groups for several reasons, for example when you are referring to someone or something by saying which particular class of people or things they belong to, when you do not want or need to say which particular person or thing you mean, or when you have not mentioned the person or thing before. Compare **the**. EG *The windows were open and Tom could see a hallway... The examination confirmed that the weapon was an airgun... She wanted to be an actress... You should be able to get a job in Europe... He put a foot up on the rim of the tub... ...a chap called Andrew.* DET : N COUNT IN SING

2 You can use **a** or **an** instead of the number 'one'. It is often used in front of the numbers 'hundred', 'thousand', 'million', and 'billion', and in front of fractions such as 'quarter' and 'half'. EG *...a million and a half dollars... ...a year or two ago... There were no officers on the patrol, just a corporal and six other guys.* ▸ used after fractions such as 'half', 'quarter', 'third', etc, and in front of the noun to which the fraction refers. EG *...half a dozen... ...in less than one tenth of a second... ...three-quarters of a loaf of bread.* DET : NUM, OR DET : N COUNT IN SING ▸ DET : N COUNT IN SING

3 When you express rates, ratios, prices, and measurements, you can use **a** or **an** to say how many units apply to each of the items being measured, charged, etc. EG *He charges 100 dollars an hour... ...once a year... ...five pounds a metre.* DET : N COUNT IN SING = per

4 You use **a** or **an** at the beginning of noun groups when you are saying something that applies to all members of the class, group, or type that is described by the noun group. Another way of making statements of this type is to use the plural, so that you can say 'a student has to work hard' or 'students have to work hard'. EG *An ostrich cannot fly... A cyclist has to pay when he goes over the ferry.* DET : N COUNT IN SING

5 You sometimes use **a** or **an** in spoken English in front of nouns without any adjective in order to indicate that something is fairly long, great, or good in amount, extent, or value. For example, 'It rained for a time' means that it rained for quite a long time, and 'That's an idea' means that you think that it is quite a good idea. DET : N COUNT IN SING = some

6 You can use **a** or **an** in front of uncount nouns when they are preceded by adjectives or followed by words that describe the uncount noun more fully. EG *...a tremendous earnestness... ...a happiness that he couldn't quite hide... ...a keen appreciation of the power of the media.* DET : N UNCOUNT : SUPP

7 You can use **a** or **an** in front of mass nouns when you are referring to one single portion, type, or brand of something. EG *Shall I pour you a coffee?... ...a fine red wine.* DET : N MASS IN SING

8 You use **a** or **an** in front of nouns that end with '-ing' and are formed from verbs when you refer to one instance of the activity described by the verb. EG *...a stamping of feet... A falling-off in business was expected.* DET : ING

9 You use **a** or **an** in front of the names of days, dates, months, or festivals when you are referring to one particular instance of that day, date, month, or festival. EG *It's on a Friday, isn't it?... ...a Christmas that I shall never forget.* DET : N COUNT IN SING

10 You use **a** or **an** in front of the names of people **10.1** when you are referring to someone who you do not know personally or when you do not know anything about them except their name. EG *You don't know a Mrs Burton-Cox, do you?... A Mr Peter Walker agreed to buy the house from a Mrs Dorothy Boyle.* **10.2** when you want to refer to someone else who has the same character or qualities as the person named. EG *There is no way that an Iain Macleod or a Rab Butler would have agreed to such policies.* **10.3** when you refer to someone who belongs to the family with that surname. EG *She was a Robertson before she married.* DET : N PROPER = a certain ; DET : N PROPER ; DET : N PROPER

11 You use **a** or **an** in front of the names of painters, sculptors, or writers to refer to one individual painting, sculpture, or piece of writing by them. EG *She noticed a Renoir on the wall and two Matisses... There's a new David Lodge out this month.* DET : N PROPER

a- is added to adjectives to form other adjectives, which mean that someone or something does not have the feature or quality described by the original adjective. EG *...political—apolitical... ...moral—amoral... ...symmetrical—asymmetrical.* PREFIX = non-, un-

AA /eɪ eɪ/. **1** The **AA** is a British motoring organization that helps members when their cars break down; an abbreviation for 'Automobile Association'. N PROPER : *the* + N

adhere /əˈdhɪə/, **adheres, adhering, adhered**. **1** If something **adheres** to something else, it sticks firmly to it. EG *This helps the new plaster to adhere to the old.*

V OR V + A *(to)* ⇑ attach = stick

2 To **adhere** to a rule or agreement means to act in the way that it says you should. EG *The fire regulations have been adhered to.*

V + A *(to)* ⇑ obey = keep ≠ break

3 If you **adhere** to a particular opinion or belief, you support or hold it. EG *The government has firmly adhered to the view that this is a matter for individuals to decide.*

V + A *(to)* ⇑ believe

adherence /əˈdhɪərəˈns/ is **1** the fact of adhering to a particular rule or agreement. EG *...a question about this country's adherence to the treaty.* **2** the fact of supporting a particular belief or opinion. EG *...their adherence to democratic or totalitarian systems.*

N UNCOUNT : *to* ⇑ obedience

N UNCOUNT : IF + PREP THEN *to* ⇑ attachment

adherent /əˈdhɪərəˈnt/, **adherents**. An **adherent** is someone who holds a particular belief or supports a particular person or group. EG *The cult gained adherents at an alarming rate.*

N COUNT ⇑ supporter = follower

adhesion /əˈdhiːʒəˀn/ is the state or fact of one thing sticking firmly to another.

N UNCOUNT

adhesive /əˈdhiːsɪv/, **adhesives**. **1** An **adhesive** is a substance such as glue which is used to make things stick firmly together.

N MASS

2 Something that is **adhesive** is able to stick firmly to something else. EG *...adhesive tape.*

ADJ CLASSIF = sticking

ad hoc /æd hɒk/. Something that is **ad hoc** or that is done on an **ad hoc** basis happens or is done only when the situation makes it necessary or desirable, rather than being arranged in advance or being part of a general plan. EG *The group met on an ad hoc basis, just as needs came up... ...an ad hoc committee.* ▸ used as an adverb. EG *Ministers were appointed ad hoc to their jobs.*

ADJ CLASSIF : ATTRIB ⇑ temporary = makeshift ≠ planned ▸ ADV WITH VB

adieu /əˈdjuː/ means the same as goodbye; a literary or old-fashioned word.

CONVENTION

ad infinitum /æd ɪnfɪnaɪtəm/. If something happens **ad infinitum**, it is repeated again and again in the same way. EG *She then teaches it to her daughter, and so on ad infinitum.*

PHR : USED AS AN A ⇑ for ever = endlessly

ADJ □ In this dictionary ADJ is used in the grammar notes beside entries to mean 'adjective'. For explanations of different kinds of adjective, see □ at ADJ AFTER N, ADJ CLASSIF, ADJ COLOUR, and ADJ QUALIT. See also □ at ATTRIB and PRED.

adjacent /əˈdʒeɪsəˀnt/. If something is **adjacent** to something else, or if two things are **adjacent**, they are next to each other. EG *The bench was adjacent to the court... He took me to the adjacent room.*

ADJ CLASSIF : IF + PREP THEN *to* = adjoining

ADJ AFTER N □ In this dictionary ADJ AFTER N is used in the grammar notes beside entries to mean that an adjective can only be used after a noun. Examples are **elect 3** and **galore**. EG *The president **elect**... There are empty houses **galore**.* You do not say 'The president is elect' and you do not say 'There are galore empty houses'.

ADJ CLASSIF □ In this dictionary ADJ CLASSIF is used in the grammar notes beside entries to mean that an adjective is a classifying adjective. ADJ CLASSIFS behave in the following ways: **1** They are adjectives that cannot have more or less of the particular quality that they describe, and so they cannot have adverbs like 'very', 'more', or 'rather' in front of them. Compare ADJ QUALIT. An example is **dead** . EG *...his **dead** wife... ...money inherited from a **dead** relative.. Tell him Antonio is **dead**.* You do not say 'His wife is more dead than she was yesterday'. **2** If a group of adjectives of different types are used together, an ADJ CLASSIF comes after a qualitative adjective (ADJ QUALIT) and a colour adjective (ADJ COLOUR). An example is **woollen** in *...a big red **woollen** scarf*, and **medieval** in *...a large **medieval** castle.* See also □ at ATTRIB and PRED.

ADJ COLOUR □ In this dictionary ADJ COLOUR is used in the grammar notes beside entries to mean that an adjective is a colour adjective such as *red* or *blue*. ADJ COLOURS behave in the following ways: **1** They can have another adjective before them which defines the colour more exactly, such as *pale*, *bright*, *clear*, and *light*. **2** If a group of adjectives of different types are used together, an ADJ COLOUR comes after a qualitative adjective (ADJ QUALIT) and before a classifying adjective (ADJ CLASSIF). An example is **red** in *...a big **red** woollen scarf.*

adjectival /ædʒɪ'kta1ɪvə'l/ means consisting of or relating to adjectives. EG *...the structure of adjectival groups in English.* ADJ CLASSIF

adjective /'ædʒɪktɪv/, **adjectives**. An **adjective** is a word that gives more information about a noun or pronoun, by selecting or restricting its meaning. The abbreviation ADJ is used in the grammar notes beside the entries to mean 'adjective'. See □ at ADJ, ADJ AFTER N, ADJ CLASSIF, ADJ COLOUR, ADJ QUALIT, ATTRIB, and PRED. N COUNT

adjoin /ə'dʒɔɪn/, **adjoins, adjoining, adjoined**. If a room, place, or object **adjoins** another one, they are next to each other. EG *They had rooms adjoining mine.* ◊ **adjoining**. EG *People at adjoining tables looked at her in astonishment.* V + O ◊ ADJ CLASSIF USU ATTRIB

adjourn /ə'dʒɜ:n/, **adjourns, adjourning, adjourned**. **1** If a meeting, conference, enquiry, or trial **adjourns**, or if someone **adjourns** it, it is stopped for a short time. EG *The conference adjourned... He announced that the trial would be adjourned until the next morning.* V ERG ⇑ stop

2 If people **adjourn** to another room or place, they go there; used in fairly formal English. EG *Fanny suggested they should all adjourn to the garden.* V + A *(to)* = retire

adjournment /ə'dʒɜ:nmə'nt/, **adjournments**. An **adjournment** is a temporary stopping of a trial, enquiry, or other meeting. N COUNT ⇑ break

ADJ QUALIT □ In this dictionary ADJ QUALIT is used in the grammar notes beside entries to mean a qualitative adjective. ADJ QUALITS behave in the following ways: **1** They are adjectives which can have more or less of the particular quality they describe, and so they can have adverbs like 'very', 'more', or 'rather' in front of them. Compare ADJ CLASSIF. Examples are **funny**, and **terrific 1**. EG *...a very **funny** film... I found it extremely **funny**... It seemed rather **funny** at the time... ...a really **terrific** idea... You look absolutely **terrific** today.* **2** If a group of adjectives of different types are used together, an ADJ QUALIT comes before a colour adjective (ADJ COLOUR) and a classifying adjective (ADJ CLASSIF). An example is **big** in *...a **big** red woollen scarf.* See also □ at ATTRIB and PRED.

adjudge /ə'dʒʌdʒ/, **adjudges, adjudging, adjudged**. If someone is **adjudged** to be guilty, worthy, a criminal, etc, they are judged or considered to be that thing; a formal word. EG *I was adjudged an extremist.* V + O + C/*to*-INF

adjudicate /ə'dʒu:dɪkeɪt/, **adjudicates, adjudicating, adjudicated**. **1** If you **adjudicate** on an issue or **adjudicate** it, you make a formal or legal decision concerning it. EG *The boards have the right to adjudicate on the punishment of prisoners... ...to adjudicate disputes between unions and their members.* ◊ **adjudication** /ə'dʒu:dɪkeɪʃə'n/. EG *The matter is under adjudication.* V : IF : PREP THEN *on*, OR V + O ⇑ judge = decide ◊ N UNCOUNT ⇑ judgement

2 If you **adjudicate** a competition, you officially decide who the winner is. ◊ **adjudication**. V OR V + O ◊ N UNCOUNT

ADV □ In this dictionary ADV is used in the grammar notes beside entries to mean 'adverb'. In general, adverbs are used before or after verbs (see □ at ADV AFTER VB, ADV WITH VB) or before some adjectives or other adverbs (see □ at ADV : ADJ/ADV). A few adverbs add a slightly negative quality to the clause they are in (see □ at ADV BRD NEG). There is also an important class of adverbs which are associated not with any other words, but with a clause or sentence as a whole. These are called ADV SEN in the grammar notes. In this dictionary the simple notation ADV is used in the following ways: **1** Adverbs which occur frequently both with verbs and with adjectives are called simply ADV in the grammar notes. Examples are **sufficiently** (see **sufficient**) and **classically** (see **classic 1**). EG *...people who care **sufficiently** about the city to secure its future... I had not been **sufficiently** alert to ask him... The initiatives have **classically** come from the colonels... He never looked such a **classically** good player as his brother.* Such adverbs can also be used with other adverbs, although this pattern is not common. An example is **sufficiently** in *I did not feel I knew her **sufficiently** well to ask her.* **2** ADV is also used for some other words which have specialized uses but which do not occur in any of the other ADV classes. An example is **above 4**. EG *...the room **above**... I prefer the picture **above**.* **3** ADV is also used in the grammar notes beside phrasal verbs to show that the second part of the phrasal verb is an adverb. See □ at PHRASAL VB.

ADV : ADJ/ADV □ In this dictionary ADV : ADJ/ADV is used in the grammar notes to mean that an adverb is not used with verbs but only in front of adjectives and other adverbs. It is not used in front of another adverb of the same type. This type of adverb is sometimes called an adverb of degree. Examples are **very**, **relatively**, and **wonderfully** (see **wonderful**). EG *It was **very** cold... I had known them for a **very** long time... The old lady came out **very** quietly... We were **relatively** unsuccessful... Natkin's work has sold **relatively** well... He told a **wonderfully** funny story... She was always **wonderfully** kind to me.*

ADV AFTER VB □ In this dictionary ADV AFTER VB is used in the grammar notes beside entries to mean that an adverb can only be used after a verb. If the verb is transitive (V + O) the adverb sometimes comes after both the verb and its object. See also ADV WITH VB. Examples are **down 1.2**, **aside 1**, and **indoors**. EG *She nodded and looked **down**... She had her head **down** and she didn't see him... Mr Casey stepped **aside**... She knocked his hand **aside**... She hurried **indoors**... Freda had taken Tom **indoors** for a bath.*

advance /ə^{d}vɑːns/, **advances, advancing, advanced**. **1** To **advance** means **1.1** to move forward, especially in a threatening way or in order to attack someone. EG *The snake advances smoothly and silently... She advanced on him, shouting and waving her umbrella threateningly.* ◊ **advancing**. EG *I eyed the advancing figure carefully... ...the advancing enemy tanks.* **1.2** to make progress and become more sophisticated, especially in your knowledge or understanding of something. EG *We have greatly advanced in our understanding of the human body.* ● See also **advanced**. V ⇑ approach ≠ retreat / ◊ ADJ CLASSIF ATTRIB / V = improve

2 When time **advances**, it passes by; a fairly formal use. EG *As the evening advanced we got more and more friendly.* V = wear on

3 If you **advance** a cause or interest, you support it and help it to be successful; a fairly formal use. EG *The government took every opportunity to advance the national interest.* V + O = further

4 To **advance** an event, or the time or date of an V + O

event, means to bring it forward to an earlier time or date. EG *The date of the meeting was advanced by two weeks.*

5 If you **advance** a theory or idea, you put it forward for discussion; a fairly formal use. V + O ⇑ suggest

6 If you **advance** a sum of money to someone, you lend it to them, or pay it to them before they are due to receive it. EG *The bank agreed to advance him £3000 to start his business... You may have to advance the builder some money for materials.* V + O + O, OR V + O + A *(to)* ⇑ give

7 If you **advance** a tape, film, or clock, you turn or wind it forwards. EG *Close the camera and advance the film with the winder.* V + O ⇑ reset

8 When prices or values **advance**, or when you **advance** them, they increase in amount; a formal use. V ERG = rise

9 An **advance** is **9.1** a forward movement of people or vehicles, especially of soldiers. EG *The enemy were planning a new advance on the capital... The convoy's speed of advance was twenty knots.* **9.2** money which is lent to someone or paid to them before they are due to receive it. EG *Authors are often given an advance on royalties.* **9.3** an increase in the price or value of something. EG *Is there any advance on five thousand?* N COUNT/UNCOUNT = approach ≠ retreat; N COUNT; N COUNT = rise

10 If you make **advances** to someone, you try to persuade them to start a friendly or sexual relationship with you. EG *Her husband heard about the advances Simon had made to his wife... The unions seemed to respond favourably to the management's advances.* N PLURAL ⇑ approaches = overtures

11 Advance in a particular field, subject, industry, etc is progress in understanding it or in developing new ideas and techniques. EG *The space programme has speeded up the rate of technological advance... Remarkable advances have been made recently in medicine.* N COUNT/UNCOUNT = development

12 The **advance** of a future time or event is the gradual approach of it as time passes. EG *With the advance of old age he lost some of his enthusiasm for life.* N UNCOUNT : SUPP = onset

13 An **advance** booking, warning, notice, etc is done or given before an event happens. EG *Advance booking is essential for very popular plays... We weren't given any advance warning of his visit.* ADJ CLASSIF : ATTRIB = prior

14 An **advance** party or group is a small group of people who go on ahead of the main group, especially in order to make preparations or to find out what conditions are like. ADJ CLASSIF : ATTRIB = reconnaissance

15 in advance. 15.1 If an idea or product is **in advance** of another one, it is more highly developed or more sophisticated. EG *Their training facilities are far in advance of anything we have.* **15.2** If you do something, or if something happens, **in advance**, you do it, or it happens, before the expected time. EG *He arrived half an hour in advance.* **15.3** If you do something **in advance** of a date or event, you do it before that date or event. EG *We booked our seats well in advance of the date we wanted to travel... The landlady wanted three months' rent in advance.* PHR + *of* = ahead ≠ behind; PHR : USED AS AN A. IF + PREP THEN *of* = early; PHR : USED AS AN A. IF + PREP THEN *of* ⇑ ahead

advanced /ədˈvɑːnst/. **1** An **advanced** student has already learned the basic facts of a subject and is doing more difficult work. EG *...a dictionary for advanced learners.* ▸ used of a subject or course of study. EG *...advanced mathematics... ...an advanced course in the writing of plays for television.* ADJ QUALIT; ▸ ADJ CLASSIF : ATTRIB ≠ elementary

2 A person or country that is **advanced** has reached a high level of development. EG *Japan is rapidly becoming the most advanced country technologically... Her youngest child is very advanced for his age.* ADJ QUALIT ≠ backward

3 Advanced books or ideas are very modern and new, and are often considered unacceptable by ordinary people. EG *...a modern man with advanced ideas.* ADJ QUALIT = avant-garde ≠ conventional

4 If someone is of **advanced** age or years, they are very old. EG *...a man of advanced years.* ADJ QUALIT = mature

5 If you say that a day, year, etc is **advanced**, you mean that time has passed. EG *The day was not advanced enough for it to be really hot.* ADJ QUALIT : PRED

advancement /ədˈvɑːnsmənt/ is **1** promotion in your job, or to a higher social class. EG *The new system leaves less opportunity for personal advancement.* **2** the process of helping something to happen or to succeed. EG *...the advancement of international peace.* N UNCOUNT ⇑ progress; N UNCOUNT : SUPP = furtherance

advantage /ədˈvɑːntɪdʒ/, **advantages. 1** An **advantage** is **1.1** something that puts you in a better position than other people. EG *Having a driving licence can be a big advantage... The voting system gives an advantage to the larger parties.* **1.2** a benefit or improvement that is likely to result from something. EG *What possible advantage could there be in changing your job now?... She explained the advantages of the new system over the old one.* N COUNT ≠ drawback

2 Advantage is the state of being in a stronger or better position than others who are competing against you. EG *...a position of advantage... He had skilfully exploited the idea to electoral advantage.* N UNCOUNT ⇑ supremacy

3 In tennis, **advantage** is used to refer to the first point scored after deuce in a game of tennis. EG *'Advantage McEnroe'.* N UNCOUNT : N PROPER

4 Advantage is also used in the following expressions. **4.1** If a course of action **is to** your **advantage**, it will be useful for you to do it. EG *It might be to your advantage to learn Spanish.* **4.2** If you **turn** a situation **to** your **advantage,** you act skilfully and manage to gain benefit from it, although it seemed at first to be unfavourable to you. **4.3** If you **have the advantage over** someone, or something **gives** you **the advantage over** them, you are in a better position than they are. EG *His strength gives him the advantage over us.* **4.4** If you **take advantage of** someone, you treat them unfairly or deceive them for your own benefit. **4.5** If you **take advantage of** something, you make good use of it while you can. EG *We took advantage of the dry weather to paint the house.* **4.6** If something is shown **to good advantage** or **to the best advantage**, it is shown in a way that emphasizes how attractive it is. EG *The plain walls show the paintings to good advantage.* PHR : VB INFLECTS; PHR : VB INFLECTS; PHR : VB INFLECTS; PHR : VB INFLECTS; PHR : VB INFLECTS; PHR : USED AS AN A ⇑ favourably = effectively

advantaged /ədˈvɑːntɪdʒd/. Someone who is **advantaged** is in a better social or financial position than other people. ADJ QUALIT ⇑ favoured = privileged

advantageous /ædvənˈteɪdʒəs/. Something that is **advantageous** to you is likely to benefit you or improve your situation. EG *You're in a very advantageous position.* ◊ **advantageously**. ADJ QUALIT ⇑ helpful = favourable; ◊ ADV

ADV BRD NEG □ In this dictionary ADV BRD NEG is used in the grammar notes beside entries to refer to a small group of adverbs, which are sometimes called 'broad negatives'. They are **hardly, scarcely, barely, seldom** and one or two others. These adverbs have two main characteristics: **1** They add what appears to be a negative meaning to a clause, by denying the relevance of the positive statement they are making. An example is **hardly**. EG *I had **hardly** got into the house when the phone rang.* This means that although you had just got into the house, your attitude is that you have not really had enough time there for your being inside to be worth considering. Other examples are **scarcely** and **barely**. EG *I could **scarcely** believe what I heard... He **barely** listened to what his brother was saying.* **2** They feature in an unusual structure which emphasizes them. They are used as the first word in a clause, and are followed by an auxiliary or modal verb and then the subject. There is always another clause beginning with 'when' or 'than' or 'but' or a prepositional phrase beginning with 'without'. Examples are **hardly** and **seldom**. EG ***Hardly** had the car come to a standstill than she jumped out... **Seldom** did a week pass without a request for information.*

advent /ædvənt/. **1** The **advent** of something important is the fact of it starting or coming into existence; a rather formal use. EG *This sort of work would have been inconceivable before the advent of microprocessors.* N SING : WITH POSS = appearance

2 The **advent** of a person at a place is their arrival there; a rather literary use. EG *Their eyes light up at Mr Roberts' advent.* N SING : WITH POSS

adventitious /ædvɛnˈtɪʃəs/. An event or situation that is **adventitious** happens or exists by chance or unexpectedly; a formal word. EG *His knowledge of this particular bishop was somewhat adventitious.* ADJ QUALIT ⇑ unexpected = accidental ≠ planned

adventure /ədˈvɛntʃə/, **adventures**. An **adventure** is something you do or a situation you become involved in that is unusual, exciting, and rather dangerous. EG *...my Arctic adventures... They were bored, and looking for adventure.* N COUNT/UNCOUNT ⇑ experience

adventure playground, adventure playgrounds. An **adventure playground** is a rough area of land for children to play in, usually in cities. It has unusual wooden structures and equipment such as ropes, nets, and rubber tyres. N COUNT

adventurer /ədˈvɛntʃərə/, **adventurers**. An **adventurer** is **1** a person, especially a man, who tries to become rich or powerful by using dishonest or N COUNT = shark

immoral methods; used showing disapproval. EG ...*rogues and adventurers.* **2** a person who enjoys adventure. EG ...*an island race of adventurers.* N COUNT

adventurous /ədˈventʃərəs/. Someone who is **adventurous** is **1** willing to take risks and to try new methods. EG *I can't help wishing that Sinclair had been a bit more adventurous... They might perhaps be more adventurous in their repertoire.* ◊ **adventurously**. EG *We should be using the money more adventurously.* **2** eager to visit new places and have new experiences. EG *The romance of the east had appealed to his adventurous spirit.* ADJ QUALIT ⇑ bold = daring ≠ cautious ◊ ADV WITH VB ADJ QUALIT = bold, venturesome

adverb /ædvɜːb/, **adverbs**. An **adverb** is a word that adds information about the verb in a clause, or about a following adjective or adverb, or sometimes about a following prepositional group. Examples are *outside, extremely, physically* and *straight* in *They went outside... Progress was extremely slow... Judy seemed physically unwell... She went straight into the bathroom.* In this dictionary the abbreviation ADV is used in the grammar notes beside the entries to mean 'adverb'. See ADV, ADV + ADJ/ADV, ADV AFTER N, ADV AFTER VB, ADV BRD NEG, ADV SEN, ADV WITH VB. N COUNT

adverbial group /ædvɜːbɪəl gruːp/, **adverbial groups**. In grammar, an **adverbial group** is a single adverb functioning on its own or a group of words of which the main word is an adverb. N COUNT ⇑ adjunct

adversary /ædvəsəˈri/, **adversaries**. Your **adversary** is the person or country that you are competing with, or arguing or fighting against. EG *His principal adversary was David Lloyd George... ...his political adversaries... Of the two potential adversaries, Britain was not yet ready to commit herself.* N COUNT + SUPP = opponent ≠ ally

adverse /ædvɜːs/. **Adverse** decisions, conditions, or effects are unfavourable to you or the opposite of what you want or need. EG *Higher energy costs seem certain to have an adverse effect on the economy... ...adverse weather conditions.* ◊ **adversely**. EG *The majority of children are adversely affected.* ADJ QUALIT ATTRIB ⇑ bad ≠ favourable ◊ ADV WITH VB ⇑ badly

adversity /ədˈvɜːsɪtiˈ/, **adversities**. **Adversity** is a situation in which you have many difficulties and problems and everything seems to be against you. EG *They continue to fight in the face of adversity.* N UNCOUNT : COUNT ⇑ suffering = misfortune

advert /ædvɜːt/, **adverts**. An **advert** is an advertisement; an informal word. N COUNT

advertise /ædvətaɪz/, **advertises, advertising, advertised**. **1** If you **advertise** a particular product or item for sale, you tell people about it in newspapers, on television, on posters, etc in order to persuade them to buy it. EG ...*a sign which advertised Calor gas... ...deodorants she had seen advertised on television.* V + O : IF + PREP THEN *in/on* ⇑ publicize = promote

2 If you **advertise** a particular event, especially in a newspaper or on a poster, you announce that it is happening, so that people know about it and can go to it or take part in it. EG ...*a leaflet advertising a fishing competition.* V + O : IF + PREP THEN *in/on* = publicize

3 If you **advertise** a particular job, or **advertise for** people to do a job, you have an announcement printed in a newspaper asking anyone interested to apply for it. EG ...*application forms for jobs advertised in the papers... The Council advertise from time to time for accountants and clerical staff.* V + O : IF + PREP THEN *in/for* ⇑ request

4 If you **advertise** a particular quality or characteristic, you show it in your appearance, speech, or behaviour. EG *The crudeness of his features advertised his ruthless and brutish nature.* V + O = proclaim ≠ conceal, hide

advertisement /ədˈvɜːtɪsməˈnt/, **advertisements**. **1** An **advertisement** is an announcement in a newspaper, on television, or on a poster about a product, event, job vacancy, etc. EG ...*an advertisement for Black and White whisky... ...all the applications we have received in answer to our advertisements.* **2** If someone or something is an **advertisement** for something, they show the advantages or benefits of it and are likely to convince other people that it is a good thing. EG *He wanted to make the Post Office an advertisement for public ownership.* N COUNT ⇑ notice = advert, ad N COUNT + *for* = advert

advertiser /ædvətaɪzə/, **advertisers**. An **advertiser** is a person or company that pays for a product, event, or job vacancy to be advertised on television, in a newspaper, etc. EG *We've had several phone calls already this morning from advertisers.* N COUNT

advertising /ædvətaɪzɪŋ/ is the activity of telling people about products and making them seem attractive so that people want to buy them. EG ...*a job in advertising... ...an advertising agency... The tobacco industry spends 100 million pounds a year on advertising... ...the marketing and advertising of powdered milk.* N UNCOUNT = promotion, publicity

advice /ədˈvaɪs/. **1** If you give someone **advice**, you tell them what you think they should do in a particular situation. EG *She promised to follow his advice... They want advice on how to do it... One woman went to a psychiatrist for advice.* ● If you **take advice**, or **take legal advice**, you ask a lawyer about your position in law regarding a particular matter. EG *Taking legal advice is not something that any of us do lightly.* N UNCOUNT : USU + SUPP ⇑ help = counsel ● PHR : VB INFLECTS

2 Advice is also an official, legal, or business document that states that something has been done or will be done, for example that the goods you have ordered from a firm have been sent. EG ...*an advice note... We received advice of delivery.* N UNCOUNT + SUPP ⇑ notification

advisable /ədˈvaɪzəbəlˈ/. If a course of action is **advisable**, it is sensible, involves little risk, or is likely to achieve the result you want. EG *It's advisable to ring up first to make an appointment.* ◊ **advisability** /ədˈvaɪzəbɪlɪtiˈ/. EG ...*the advisability of settling as near as possible to the centre of town... They pondered the advisability of another attempt.* ADJ QUALIT = wise ≠ foolish, inadvisable ◊ N UNCOUNT : *the* + N + *of* ≠ folly

advise /ədˈvaɪz/, **advises, advising, advised**. **1** If you **advise** someone to do something in a particular situation, you tell them that you think they should do it. EG *He advised me not to buy it... I would strongly advise you against it... It was his doctor who advised that he change his job.* ● See also **well-advised, ill-advised**. V + O, V + O + *to*-INF : REPORT CL, V + O + A *(on/against)*, OR V + A (ON/AGAINST) ⇑ suggest = recommend

2 Someone who **advises** a particular person or organization regularly gives them suggestions about improving and developing their activities and methods. EG *The Advisory Council advises the BBC on Further Education problems.* V OR V + O : IF + PREP THEN *on* ⇑ help = guide

3 If you **advise** someone of something, you inform them about it; a formal word. EG *The company spends a lot of time keeping its salesmen advised of new products.* V + O : IF + PREP THEN *of* ⇑ tell

advisedly /ədˈvaɪzɪdˈlɪ/. If you say that you are using a word or expression **advisedly**, you mean that you have deliberately chosen to use it, although it may sound odd or wrong, because it draws attention to what you are saying. EG ...*as requested. I use the phrase advisedly, because it depends who is doing the requesting.* ADV = on purpose

adviser /ədˈvaɪzə/, **advisers**; also spelled **advisor**. An **adviser** is someone who is asked to give suggestions to another person or to a group of people about what they should do. EG *I was Charlotte's friend and adviser... ...an independent legal adviser.* N COUNT + SUPP ⇑ guide = counsellor

advisory /ədˈvaɪzəˈriˈ/. An **advisory** group, or a group or person with an **advisory** role, regularly gives suggestions and help to people or organizations, especially about a particular subject or area of activity. EG ...*the National Women's Advisory Committee... His role is 'purely advisory'... Most of the advisory work is carried out over the phone.* ADJ CLASSIF ⇑ guiding = consultative

advocacy /ædvəkəsiˈ/. **Advocacy** of a particular action or plan is the act of supporting it publicly. EG ...*their advocacy of a strong state and a single party.* N UNCOUNT : IF + PREP THEN *of* ⇑ support ≠ opposition to

advocate, advocates, advocating, advocated. The word **advocate** is pronounced /ædvəkeɪt/ when it is a verb, and /ædvəkət/ when it is a noun. **1** If you **advocate** a particular action or plan, you support it publicly. EG *He advocated the creation of a permanent United Nations.* V + O/REPORT-CL = recommend ≠ oppose

2 An **advocate** of a particular action or plan is someone who supports it publicly. EG ...*the advocates of women's rights... ...a leading advocate of free enterprise.* ● See also **devil's advocate**. N COUNT WITH POSS ⇑ supporter

3 An **advocate** is a lawyer who speaks in favour of someone or defends them in a court of law. N COUNT = barrister

ADV SEN □ In this dictionary ADV SEN is used in the grammar notes beside entries to show that an adverb or an expression with an adverbial function applies to a clause or a sentence as a whole. These adverbs are usually placed at the beginning of a clause followed by a comma or in the clause separated by commas. A few come at the end of the clause. **1** An ADV SEN may show the way in which sentences link together. An example of this is **however**. EG *I am not responsible for what my critics write.* ***However,*** *in this case, Fred is right... There is,* ***however,*** *an alternative approach... Most people think that David is really nice. Not me,* ***however.*** **2** An ADV SEN may make a comment on the main sentence. Examples are **unfortunately** and **of course** (see **course 1**). EG ***Unfortunately,*** *I*

wasn't able to visit him... My own opinion, ***unfortunately****, backs him up... 'Where shall we meet?'–'At the golf club,* ***of course****'.* **3** An ADV SEN may also be a signal in the spoken discourse which gives information to a hearer about, for example, a speaker's attitude or intention. An example of this is **anyway**. EG *We're all short of money–I am,* ***anyway****... And* ***anyway*** *I feel so mean bothering him about it...* ***Anyway****, what does it matter to you?*

ADV WITH VB □ In this dictionary ADV WITH VB is used in the grammar notes beside entries to mean that the adverb comments on a verb and is not used before an adjective or another adverb. An ADV WITH VB may come before or after the verb. If it comes after a transitive verb (v o) it sometimes comes after both the verb and its object. Sometimes it is more usual for the adverb to come in one position in relation to the verb rather than the other and the examples in the entry will show this. See also □ at ADV AFTER VB. Examples are **busily**, **concisely**, and **voluntarily**. EG *Eddie was* ***busily*** *engaged in building a hut... Judy typed* ***busily****... She answered the vicar's questions calmly and* ***concisely****... No one could describe him as* ***concisely*** *as Cocteau has done in his caricature... He left* ***voluntarily****.*

adze /ædz/, **adzes**; also spelled **adz** in American English. An **adze** is a heavy tool used for cutting and shaping wood. It has a blade at right angles to its handle. N COUNT

-ae is added in place of -a at the end of some singular nouns to form the plural. Some of these nouns also have plural forms ending in -s that are used in less formal or less technical English. EG *...formula—formulae... vertebra—vertebrae... antenna—antennae.* SUFFIX : FORMS PLURALS

aegis /iːdʒɪs/. If you do something **under the aegis of** a person or organization, or you are **under** their **aegis**, you have their official support and backing; a formal expression. EG *The students spearhead a campaign under the aegis of Amnesty International.* PREP, OR PHR : USED AS AN A = under the auspices of

aeon /iːən/, **aeons**; also spelled **eon** in American English. An **aeon** is an extremely long period of time. EG *...a dread that reaches back over the aeons to primitive man.* N COUNT : USU PL = age

aerate /ɛəreɪt/, **aerates, aerating, aerated**. If a substance in the form of a liquid is **aerated**, air or gas is passed through it in order to make it more fizzy or to make it less dense when it solidifies. EG *...some ghastly aerated chemical confection.* V o : USU PASS

aerial /ɛərɪəl/, **aerials**. **1** **Aerial** means fixed above the level of the ground, or moving through the air. EG *...its adaptation to an aerial existence... The remaining aerial walkway was removed.* ADJ CLASSIF : ATTRIB ≠ earth-bound, ground level

2 An **aerial** attack on a target is made from aeroplanes. EG *The British continued their aerial strikes... ...aerial warfare.* ADJ CLASSIF : ATTRIB

3 **Aerial** photographs are photographs of land, buildings, traffic, etc which are taken from an aeroplane. ADJ CLASSIF : ATTRIB

4 An **aerial** is a device made of metal rods or wire, which receives or sends out television or radio signals. Aerials are often attached to the outside of buildings, vehicles, radios, and television sets. EG *...an aerial among the chimney pots.* N COUNT = antenna

aero- is used at the beginning of words, especially nouns, that refer to things or activities connected with aeroplanes and air travel. PREFIX

aerobatics /ɛərəˈbætɪks/ are skilful and difficult or dangerous movements made by someone flying an aeroplane. EG *They executed a series of aerobatics–criss-crossing, diving and soaring over our heads.* N PLURAL = stunts

aerobic /ɛəroʊbɪk/ means **1** using oxygen; a technical term in biochemistry. EG *During the aerobic or oxygen-consuming process, heat is given off.* **2** relating to or involving aerobics. ADJ CLASSIF : ATTRIB

aerobics /ɛəroʊbɪks/ is a form of exercise which increases the amount of oxygen in your blood, and which strengthens your heart and lungs. N UNCOUNT

aerodrome /ɛərədroʊm/, **aerodromes**. An **aerodrome** is a place or area where small aeroplanes can land and take off; used mainly in British English. EG *He circled over the aerodrome.* N COUNT = airfield

aerodynamic /ɛərəˈdaɪnæmɪk/, **aerodynamics**. **Aerodynamic** is an adjective, and **aerodynamics** is an uncount noun. **1** **Aerodynamics** is the scientific study of the way objects move through air, and the way air and other gases move. N UNCOUNT

2 **Aerodynamic** means involving or relating to the principles of aerodynamics. EG *The wing outline of a bird conforms to the same aerodynamic principle as that of an aircraft.* ADJ CLASSIF : ATTRIB

3 Something such as a car that has an **aerodynamic** shape or design moves through the air easily and efficiently and goes faster and uses less fuel than other cars. ADJ QUALIT

aeronautical /ɛərəˈnɔːtɪkəl/ means involving or relating to the design and construction of aeroplanes. EG *...the Department of Aeronautical Engineering.* ADJ CLASSIF : USU ATTRIB

aeronautics /ɛərəˈnɔːtɪks/ is the science of designing and constructing aeroplanes. EG *...his extensive knowledge of aeronautics.* N UNCOUNT ⇑ study

aeroplane /ɛərəˈpleɪn/, **aeroplanes**. An **aeroplane** is a vehicle with wings and one or more engines that enable it to fly through the air; used mainly in British English. EG *It's a low-cost aeroplane and it doesn't use much energy.* N COUNT ⇑ aircraft = plane, airplane

aerosol /ɛərəˈsɒl/, **aerosols**. An **aerosol** is a small metal container in which a substance such as paint, deodorant, or insecticide is kept under pressure. When you press a button the substance is forced out as a fine spray. N COUNT

aerospace /ɛərəˈspeɪs/. The **aerospace** industry and **aerospace** companies are involved in developing and making rockets, missiles, space vehicles, and equipment used in them. EG *...aerospace engineers.* ADJ CLASSIF : ATTRIB ⇑ space

Aertex /ɛəteks/ is a trademark for a loosely woven cotton material which is used for making shirts, underwear, and clothes worn while playing sports. EG *...an apple-green Aertex shirt.* N UNCOUNT ⇑ fabric

aesthete /iːsθiːt/, **aesthetes**; also spelled **esthete** in American English. An **aesthete** is someone who loves and appreciates works of art and beautiful things. N COUNT ⇑ person

aesthetic /iːsˈθetɪk/, **aesthetics**; also spelled **esthetic** in American English. **Aesthetic** is an adjective, and **aesthetics** is an uncount noun. **1** **Aesthetic** means relating to the appreciation of beauty or art. EG *...a purely aesthetic appeal... ...timeless aesthetic values.* ◊ **aesthetically**. EG *His best pieces seem aesthetically successful.* ADJ CLASSIF ◊ ADV

2 **Aesthetics** is a branch of philosophy concerned with the study of the concept of beauty. N UNCOUNT ⇑ theory

aether /iːθə/. See **ether**.

afar /əfɑː/; an old-fashioned or literary word. **1** **From afar** means from a long way away. EG *He rode up and saw me from afar... She grinned at me from afar.* PHR : USED AS AN A

2 If you admire someone **from afar**, you admire them without having an opportunity to know or talk to them. EG *Bill's wife had worshipped him from afar.* PHR : USED AS AN A

affable /æfəbəl/. Someone who is **affable** is pleasant and easy to talk to; a rather literary word. EG *The boy who brought it was very affable.* ▸ used of behaviour. EG *The interview was affable.* ◊ **affably**. EG *He received us affably.* ◊ **affability** /æfəbɪlɪtiˈ/. EG *There was a pretence of affability.* ADJ QUALIT = genial ≠ disagreeable ◊ ADV WITH VB ◊ N UNCOUNT

affair /əfɛə/, **affairs**; also spelled **affaire** in paragraph 6. **1** You can refer to an event or a series of events as an **affair**, or as a particular kind of **affair** when you are summarizing all its features or aspects. EG *The Churchill affair was not a decisive factor... The wedding was a quiet affair... An enquiry will be conducted into the whole affair.* N COUNT : SUPP : USU SING = business, matter

2 You can refer to an object as a particular kind of **affair** when you want to summarize its features or your opinion of it; an informal use. EG *The house was an imposing, mock Georgian affair... Some wore quilted affairs like dressing gowns.* N COUNT : SUPP ⇑ thing = effort

3 **Affairs** relating to a particular subject, country, or organization are all the important information or events that are connected with it; a formal use. EG *...a specialist in Eastern European affairs... Participation in public affairs is encouraged... ...affairs of state.* ● See also **current affairs, state of affairs**. N PLURAL : SUPP = matters

4 Your **affairs** are all the things connected with your personal life and work which you consider to be private. EG *What had induced the absurd woman to meddle in his affairs?* N PLURAL : WITH POSS = concerns

5 Something that is your **affair** concerns you, and it is your right or duty to deal with it. EG *What went on behind that door was your own affair... It's no affair of mine.* N SING WITH DET : POSS + N = business

6 An **affair** or **affaire** is a temporary or secret sexual relationship between two people, especially when one or both of them are married to someone else. EG N COUNT

I had an affair with her before the war... ...an extramarital affair. ● See also **love affair**.

affect /ə³fekt/, **affects, affecting, affected.** 1 When something **affects** someone or something else, it influences them or causes them to change in some way. EG *...the ways in which computers can affect our lives... Insects are greatly affected by body temperature.*

V + O

PHR : USED AS ADV SEN

8 After all is used **8.1** when you are stating a reason or opinion that relates to the previous statement. EG *They did not expect heavy losses in the air; after all, they had superb aircraft... It had to be recognized, after all, that I was still a schoolboy.* **8.2** when you are saying that something is or might be the case, in spite of things that have happened or that have been said or done. EG *The women began to think maybe she was not so mad after all... Could it be true, after all, that money did not bring happiness?*

PHR : USED AS ADV SEN

PHR : USED AS ADV SEN = in fact

9 All but. 9.1 All but a particular thing, person, way, etc means everything, everyone, or every way except for the one mentioned. EG *It was clear of all but the faintest trace of smoke... The paralysing effect of chemical warfare on all but those equipped to deal with it.* **9.2 All but** is used to say that something is almost the case. EG *I had all but finished... She was all but stark naked.*

PHR

PHR = almost

10 all in. 10.1 If you are **all in**, you are exhausted; an informal use. **10.2** If something such as an activity is a particular price **all in**, that price includes everything that is offered; an informal use. EG *Evening on the river: dinner, dancing, wine–£30 all in.*

PHR : USED AS C

PHR : USED AS AN A = inclusive

11 All in all is used to introduce a summary or generalization, or an opinion which is based on facts or reasons that have already been given. EG *All in all, consultations between the two groups lasted three weeks... All in all, I'm not in favour.*

PHR : USED AS ADV SEN

12 All of followed by a number or amount is used in speech to say that a particular total is not less than this, and often to express surprise at how large or small it is. EG *There were all of six people there... It cost all of three hundred pounds.*

PHR + NUM

13 All that is used in spoken English with negatives when you want to deny something without being too emphatic or definite. EG *He is not all that warm, just*

PHR : WITH BROAD NEG

warm enough... I don't know him all that well, actually... It isn't as awful as all that.

14 You use expressions like **all very well** and **all very fine** when you want to say that you consider a particular situation or thing unacceptable, although other people may think that there is nothing wrong with it; often used to express disagreement, scorn, dislike, annoyance, or envy. EG *I mean it's all very well to say that you dislike it, but what are you going to do about it?... It was all very fine for the birds, I supposed. However, I preferred a different sort of life... Look, Lynn, it's all very well, but he scared the life out of me....*

PHR : USED AS C, IF + PREP/VB THEN *for/to*-INF

15 You can say **and all** 15.1 when you are referring vaguely to other things, qualities, actions, etc which are associated with the one or ones just mentioned. EG *The drawer was full of old love letters and holy medals and dirty pictures and all... He was getting drunk every night and having love affairs and all that sort of thing... They called for a doctor and all the rest of it.* **15.2** when you want to emphasize that you are talking about the whole of a group or thing. EG *It would be embarrassing to everybody, foreign statesmen and all... It swallowed the bird whole, head and all.* **15.3** in British English, to emphasize your agreement with what has just been said; an informal use. EG *'It's very good.'–'It is and all.'*

PHR : USED AS AN A

PHR = too

16 At all is used to give emphasis in negative clauses, in clauses with words like 'any', 'anyone', or 'anything', in clauses with 'if' or 'whether', and in some kinds of questions. EG *We didn't go there at all... We've very little in those fields at all... I was ready to go anywhere at all... The meal would have been extremely late, if indeed it appeared at all... Haven't you got any at all?*

PHR : USED AS AN A

17 If you say that a particular quality or thing **is all**, you are saying that it is very important. EG *Secrecy was all.*

PHR : VB INFLECTS

18 For all is used **18.1** in opinions or statements in order to say that a particular fact does not affect or contradict them, although you are aware that it appears to do so. EG *It's pretty hard on such a sensitive girl, but for all her sensitivity, she's extremely tough.... For all their differences among themselves, they reached some kind of consensus, some common philosophy of life.* **18.2** in expressions such as 'for all I know', 'for all we had heard', and 'for all he cares', when you want to emphasize that the possibility that you have just mentioned does not really matter. EG *It might have been tomato soup for all we knew... I might as well have been down in the blackest pit, chained to a post, for all the difference the seasons meant to me.*

PHR : USED AS ADV SEN = despite

PHR : USED AS ADV SEN

19 If you **give** your **all**, you make the maximum effort possible. EG *He played fair, he gave his all.*

PHR : VB INFLECTS

20 In all means in total. EG *There were twenty-two in all.*

PHR : USED AS AN A

21 Of all is used to emphasize the words 'first' or 'last', or a superlative adjective or adverb. EG *This view is best of all towards the close of the day... I asked them first of all if they were Welsh.*

PHR : SUPERL/ *first/last* + PHR

22 Expressions such as **of all things**, **of all people**, and **of all places** are used to suggest that a particular thing, person, or place seems surprising or unlikely. EG *Why should they, of all people, believe that this is the right thing to do?... They were arguing about the Emperor, of all things... She went to live in Naples of all places.*

PHR : USED AS AN A, USU NG + PHR ⇑ surprisingly

23 Expressions such as **of all the cheek** or **of all the luck** are used to express anger, impatience, envy, etc at what someone else has said or done. EG *Of all the nerve!... Of all the dirty tricks!*

CONVENTION

24 One and all means everyone present or everyone in a particular group. EG *Thank you, one and all.*

PHR : USED AS S/O

25 You can say **that's all** at the end of a sentence when you are explaining, justifying, or correcting something and want to emphasize that nothing more happens or is the case. EG *'Why are you so worked up about it?'–'I'm not. I'm just excited, that's all...' The wind blew the door open. I had to close it, that's all.*

PHR : USED AS ADV SEN

26 You use expressions such as **that's all I want** or **it was all I needed** in order to emphasize that you definitely did not want a particular thing to happen, and to express annoyance or impatience. EG *That's all I need!... A letter like that was all he wanted.*

almost /ɔːlməʊst/ means very nearly, but not completely, totally, or exactly. **Almost** is used to qualify an adjective, adverb, noun group, verb, or conjunction. EG *I spent almost a month in China... In Oxford Street, you can buy almost anything... I had almost forgotten about the trip... Cats are in fact almost colour blind... The door opened almost before Brody had finished knocking... He's almost certainly been murdered.*

ADV
= practically

alms /ɑːmz/ are gifts of money, clothes, food, etc to poor people; an old-fashioned word.

N PLURAL
= donation

almshouse /ɑːmzhaʊs/, **almshouses**. An **almshouse** is a house which was built and run by a charity for poor or old people to live in who could not afford to pay rent.

N COUNT
= poorhouse

aloft /əlɒft/ means up in the air or in a higher place or position. EG *He was suddenly jerked off his feet*

ADV AFTER VB
PREP

and borne aloft... He stood surveying his handiwork from aloft... She called aloft.

alone /əlo͡ʊn/. **1** When someone is **alone**, **1.1** they are not with any other people. EG *I wanted to be alone... Barbara spent most of her time alone in the flat... What are you doing out here all alone?* **1.2** they are not with a particular person or a friend, but are amongst people who they do not know. EG *She was going all alone to Paris to visit her daughter... I spent a few sessions alone in the library.* **1.3** they have no family or friends and they feel miserable. EG *I had never felt so alone and without hope in my life.*

ADJ CLASSIF : PRED = by yourself

ADJ CLASSIF : PRED ⇑ unaccompanied = by yourself

ADJ QUALIT : PRED ⇑ isolated = lonely, lost

ADJ CLASSIF : PRED = on your own

2 If one person is **alone** with another person, or if two people are **alone**, they are together, without anyone else present. EG *I was alone with the attendant... We'd never spent such a long time alone together.*

3 When someone does something **alone**, especially something which is difficult or against the law, they do it without help from other people. EG *I was left to bring up my two children alone... He acted alone in the shooting.* ● When someone **goes it alone**, they have opinions which differ from those of other people, or they do something without any help or support from other people; an informal expression. EG *He no longer aimed to 'go it alone' politically.*

ADV AFTER VB ⇑ unaided = by yourself

● PHR : VB INFLECTS

4 If someone **alone** does or knows something, or if someone is **alone** in a particular situation, they are the only person who does or knows it, or who is in that situation. EG *Simon alone knew the truth... They are not alone in their belief.*

ADJ CLASSIF : PRED, OR ADV, NG : ADV

5 If someone or something **alone** is involved, or if something consists of one idea, feature, etc **alone**, no other people or things are involved. EG *Pride alone prevented her from giving up... Democracy does not consist in Parliament alone... We must have gained 100 members from this alone.*

ADJ AFTER N ⇑ only

6 If one fact or piece of evidence **alone** makes something clear, no further facts or evidence are necessary. EG *The headline alone made me know that she was involved.*

ADJ AFTER N ⇑ only = on its own

7 ● to **leave** someone or something **alone**: see **leave**. ● to **let** someone or something **alone**: see **let**. ● **let alone**: see **let**.

along /əlɒŋ/. **1** When someone or something moves or travels **along** something long and thin, for example a road or wire, they go forwards on it for some distance and follow where it leads. EG *He was driving his car along a lane in East Surrey... She led them along a carpeted corridor... The current passes along this wire here.*

PREP = down

2 Something that is situated or is happening **along** something long and thin, especially a road, river, or coastline, is situated or is happening continuously or at various places beside it from one end of it to the other. EG *There had been several patches of yellow marigolds along the path... ...the trees all along Bear Creek.*

PREP = down

3 When you look **along** something long and thin, you look down the length of it and towards one end. EG *They look along racks of bright clothes... She glanced along the corridor.*

PREP

4 A place, building, or room that is situated **along** a particular street or corridor is situated at some point on it or beside it. EG *...an old house along the Lanark Road... Room 64 was half way along on the right.*

PREP/ADV ⇑ on

5 If something is placed **along** a vertical surface, such as a wall, it is placed very close to it with the back or one of the longer sides next to it. EG *...a striped sofa along the wall.*

PREP ⇑ beside = against

6 When someone or something moves **along**, they move forward for a period of time, usually steadily and continuously. EG *I put my arm around him as we walked along... The soldiers trudged along behind the tanks.*

ADV AFTER VB

7 If something that is happening or being done is going **along** in a particular way, it is continuing to happen or progress in that way. EG *His divorce was dragging along, he said... It was going along nicely.*

ADV AFTER VB ⇑ on

8 If someone is a particular distance **along** in an activity or on a scale, they have progressed to that extent. EG *We're no further along in our research.*

ADV ⇑ on = forward

9 If someone or something is coming **along** or is sent **along**, they are coming or being sent to the place where you are. EG *Tell him to come along to Mr Gerran's room... I was originally sent along by an employment agency... The train won't be along for more than a half hour.*

ADV AFTER VB

10 If you take someone **along** when you go somewhere, you take them with you. EG *She always took her children along.*

11 If you have known something **all along** or if something has been happening **all along**, you have known it or it has been happening over a long period of time. EG *Perhaps they had been mistaken all along... ...a desire which has been there all along.*

PHR : USED AS AN A, WITH PAST PART = all the time

12 If you do something **along with** someone else or if something happens **along with** something else, you do it at the same time as them or the two things happen at the same time. EG *Along with thousands of others, he fled the country... The eggs were delivered from the farm along with the milk.*

PREP = together with

13 The word **along** is also used in the following expressions, which are explained at other places in this dictionary. ● **along the way**: see **way**. ● **along the lines of**: see **line**. ● **get along with you**: see **get along**. ● to **go along with** something: see **go along**.

alongside /əlɒŋsaɪd/. **1** If something is situated **alongside** something else or **alongside**, the two things are situated directly next to each other. EG *There was a butcher's shop alongside the theatre... A highway patrol car drew up alongside.*

PREP/ADV ⇑ beside

2 If several people, especially people doing different jobs, are working **alongside** other people or **alongside**, they are working in the same place and are co-operating with each other. EG *The idea is to get them working on simple things alongside other people.*

PREP/ADV = together with

3 When you talk about one system, attitude, philosophy, etc existing **alongside** another one, you are comparing or contrasting them, and considering whether they can exist together in harmony. EG *I cannot imagine two political systems less likely to live at peace alongside each other... 'Mariculture'-farming the ocean's food resources-will take its place alongside 'Agriculture.'*

PREP = beside

aloof /əlu:f/. **1** Someone who is **aloof** likes to be alone and does not talk much to other people or take part in activities with them. EG *He was aloof, a loner... Guy became aloof and silent, gazing past Gertrude.* ◊ **aloofness**.

ADJ QUALIT ⇑ detached = distant

◊ N UNCOUNT

2 If someone stays **aloof** from something, they do not become involved or concerned with it. EG *The Emperor kept aloof from all political parties.*

ADJ QUALIT : PRED, IF : PREP THEN *from* ⇑ distant

aloud /əlaʊd/. **1** When you say something **aloud** or read **aloud**, you speak so that other people can hear you, and do not just think the words in your mind. EG *She read aloud to us from the newspaper... In no previous war could men say aloud what was on their minds.*

ADV AFTER VB ⇑ audibly = out loud ≠ silently

2 When someone speaks or laughs **aloud**, they speak or laugh in a normal voice rather than quietly. EG *You must never speak aloud in theatres, I was told.*

ADV AFTER VB ≠ quietly

alpaca /ælpækə/ is a kind of wool which is used for making clothes. EG *...an alpaca cardigan.*

arty-crafty /ɑːtiˈ krɑːftiˈ/ means relating to or involving the creation or use of objects made by craftsmen and craftswomen; often used showing disapproval. EG *...members of an arty-crafty clique.* ADJ QUALIT

as /ɜˈz/. **As** has very little meaning in itself, but it forms an important part of many structures, which are shown in the following paragraphs. **1** You use **as** to introduce clauses that refer to time. **1.1** If something happens **as** something else happens, the two things are happening at the same time. EG *She wept bitterly as she told her story... Jot down notes on thoughts as they come... As men retire they are replaced on the board.* **1.2** You use **as** when you are mentioning the times when a particular action is necessary and the circumstances that cause it. EG *Reseal as required... Parts would be replaced as necessity dictated.* CONJ SUBORD = when, while CONJ SUBORD

2 You use the structure **as...as** in comparisons and statements in the following ways: **2.1** when you are describing the degree or amount of something by saying that it is just like something else. EG *The meal was as awful as the conversation... I'm as good a cook as she is... Has everyone eaten as much as they want?* ▸ Sometimes the first 'as' is omitted in literary English. EG *Practice had made Jack silent as the shadows.* **2.2** when you are emphasizing an adjective or adverb by using a simile like 'as quiet as a mouse' or an expression like 'as soon as possible'. Many of these similes and expressions are explained in this dictionary as phrases at one of the other words. EG *...as white as a sheet... Sheila looked as bright as a button... Treat the patient as soon as possible... The living-room was as crowded as ever.* ▸ Sometimes the first 'as' is omitted. EG *There he sat, pleased as Punch.* **2.3** when you are expressing an amount, measurement, or degree by saying that it is the same as something else, or that it is a particular number of times more or less than it. The second part of the structure is omitted if you have already mentioned the thing to which you are comparing the amount, measurement, or degree. EG *She had taken five days to write. I thought I was entitled to take as many days thinking about my reply... This fish is twice as big... There are thought to be three times as many species of insect as of all other kinds of animal put together... This earthquake had a force one third as great again as the 1906 San Francisco earthquake.* ADV *(as)* + ADV/ ADJ + PREP *(as)* ▸ PREP ADV *(as)* + ADJ/ ADV + PREP *(as)* ▸ PREP ADV *(as)* + ADJ/ ADV + PREP *(as)*

2.4 when you are emphasizing how surprising or ADV *(as)* + ADJ/

remarkable something is. EG *There were as many as five hundred baboons... They beat their wings as fast as 80 times a second... Opinion polls showed Giscard trailing Mitterrand by as much as 3 points.* ● **as far as**: see **far**. ● **as good as**: see **good**. ● **as long as**: see **long**. ● **not so much as**: see **much**.

ADV + PREP *(as)*

3 You use the structures **as...as** and **so...as** with negative words like 'not', 'never', and 'nothing' when you express the difference in degree or amount between two things. EG *I don't think weddings are as pretty as they used to be... You've never been as late as this without telephoning... There is no one as dangerous as an idealist with a machine gun... I had seldom seen him looking so pleased with himself as he was now.*

ADV *(as/so)* + ADJ/ADV + PREP *(as)*

4 You use **as** **4.1** in order to introduce a word, expression, or clause which gives information about the subject or object of the sentence. EG *You regard the whole thing as a joke... He defended the arts as 'Man's expression of his joy in labour'... They met at Knole almost as strangers... The sudden change had come as a shock to Castle... I always thought of myself as a very understanding father... Do you see English teaching as being principally an education in values?... You have been quoted as saying that you believe in capital punishment.* **4.2** in order to introduce a clause which states more clearly the particular nature of something. EG *This is a picture of my great-grandfather, as photographed in about 1890... This report only discusses unemployment as measured by statisticians but not as experienced by actual people.*

PREP, OR PREP + -ING

CONJ SUBORD

5 You use **as** when you are describing aspects, roles, and functions in the following ways: **5.1** when you are specifying the particular aspect of something that you are concerned with. EG *He established his reputation as a radical with his very first speech... How do you find out about universities as places?... ...its desirability as building land.* **5.2** when you are stating the role, job, or function of a person or thing. EG *Over the summer she worked as a waitress... We all work together as a team... Keep an empty plastic shopping bag to use as a wastepaper basket.* **5.3** when you are referring to someone's role, status, age, etc in relation to a particular time, activity, or opinion. EG *...a story she had heard many times as a girl... As a historian this kind of assertion always amuses me... I can only speak as a married man without children.*

PREP

PREP = being

6 You use **as** when you are mentioning the way that something happens or is done. EG *I like the freedom to organise my day as I want to... ...an attempt to see oneself as others see one... They were people who spoke and thought as he did.*

CONJ SUBORD ⇑ like

7 You use **as** in the following ways to introduce a clause which describes a similarity: **7.1** when you want to say that two events or situations are alike in some way. EG *She had pushed him, as she had pushed her son... As with the railways, so with coal.* ▸ When the first clause begins 'just as', the second clause usually begins 'so'. EG *Just as one gesture can have many different meanings, so many different gestures can have the same meaning.* **7.2** when you refer back to what you have just said in order to say that it also applies to someone or something else. EG *He looked over his shoulder as Jack had done... Many elderly people are at last starting out, as I did, on the road towards further education... Napalm should be banned, as should the development, production, and stockpiling of all chemical weapons.* **7.3** You also use **as** in structures after 'same': see **same**. EG *I found she was staying in the same small hotel as I was... 'What did he say?'–'The same as you'... Soon after, Lamb was asleep, the same as always.*

await /əweɪt/, **awaits, awaiting, awaited**; a fairly formal word. **1** If you **await** someone or something, you wait for them. EG *I retired to my study to await a call from Darley... I returned to the States to find the FBI awaiting me... The full story of the war must await a detailed analysis... Huey was awaiting trial for murder.* V+O ⇑ wait

2 An event or situation that **awaits** you is going to happen or come to you in the future. EG *...the adventures that awaited him... She thought of the life of ease and luxury that awaited her in Bombay.* V+O = lie ahead of

awake /əweɪk/, **awakes, awaking, awoke, awoken**. **1** Someone who is **awake** is not sleeping. EG *He is still not really awake... He lay awake all night, thinking about his new job.* ● Someone who is **wide awake** is fully awake and not at all ready for sleep. EG *By six o'clock she was wide awake.* ADJ QUALIT : PRED ● PHR : USED AS C

2 Someone who is **awake** to a situation or problem is completely aware of it and understands its likely effects. EG *She was awake to the dangers of the situation.* ADJ QUALIT : PRED+*to* = alert

3 When you **awake** or when something **awakes** you, you wake up; a literary use. EG *In the morning I awoke from a deep sleep... The noise of the wind did not awake her.* V:ERG = awaken

awaken /əweɪkəˀn/, **awakens, awakening, awakened**; a literary word. **1** To **awaken** an emotion in a person means to cause them to feel this emotion. EG *My first visit to a theatre awakened an interest which never left me... I can only hope to awaken some enthusiasm for my subject.* V+O = arouse, stir

2 When you **awaken** to a situation or when someone **awakens** you to it, you become aware of it. EG *People are at last awakening to their responsibilities... He attempted to awaken the country to a sense of its danger.* V:ERG+A *(to)*

3 When you **awaken** or when something **awakens** you, you wake up. EG *She was awakened by a loud bang.* V:ERG = awake

awakening /əweɪkəˀnɪŋ/, **awakenings**; a formal word. **1** The **awakening** of a particular emotion or feeling in someone is the start of this feeling in them. EG *There has been a sudden awakening of public opinion to the dangers of nuclear power... ...the awakening of love for another person.* N COUNT : USU+ SUPP ⇑ arousal

2 An **awakening** is the time when something such as an activity or an interest begins. EG *He was interested in the awakening of the Renaissance.* N COUNT : USU+ SUPP ⇑ beginning

3 If you have a **rude awakening**, you suddenly realize that what you are doing or the situation you are in is not satisfactory. EG *The student who goes out every night is likely to have a rude awakening when he sits his exams.* PHR : USED AS O/S ⇑ shock

award /əwɔːd/, **awards, awarding, awarded**. **1** An **award** is **1.1** a prize or certificate that you are given by an organization for doing something well or doing it better than other people. EG *The new library has won an architectural award.* **1.2** a sum of money that the government or an organization gives you for special training or study. EG *You could apply for an award if you want to learn a new skill.* **1.3** a sum of money that a court of law decides should be given to someone. EG *He received an award of £10,000 in compensation for his injuries.* N COUNT = settlement

2 To **award** someone something such as a prize or a mark means to give it to them to show what standard they have achieved. EG *This year's board awarded the top prize to reporter Carol Clay... When do you award 10 out of 10 for a piece of work?* V+O, V+O+O, OR V+O+A *(to)*

3 When a government or an organization **awards** someone a sum of money, it gives it to them for special training or study. EG *The British Government awarded him a grant of £1500.* V+O, V+O+O, OR V+O+A *(to)* ⇑ give

4 If someone such as a judge or referee **awards** something to a person, they decide and declare that the person will be given it. EG *It was the biggest libel settlement awarded up to that time... After much discussion, she was awarded the point.* V+O, V+O+O, OR V+O+A *(to)* ⇑ give

aware /əweə/. **1** If you are **aware** that something such as an important problem or difficulty exists or if you are **aware** of it, you know about it, either because you have thought about it or because you have just noticed it. EG *He was aware that he had drunk too much whisky... If only you were aware of all the facts, you would immediately change your mind... I was quite aware of this before we married... As far as I am aware attention was first drawn to this by American researchers.* ◊ **awareness**. EG *...the present public awareness of the need for conservation.* ADJ QUALIT : PRED+*of*/ REPORT-CL ≠ ignorant, unaware ◊ N UNCOUNT : *of*/REPORT-CL = realization

2 If you are **aware** of something or **aware** that something exists or is happening, you realize it because you hear it, see it, smell it, or feel it. EG *Ralph was aware of the heat for the first time that day... She became aware, out of the corner of one eye, of a sudden movement.* ADJ QUALIT : PRED+*of*/ REPORT-CL = conscious ≠ unaware

3 Someone who is **aware** pays a lot of attention to the things that are happening around them and is interested in why they are happening. EG *Some people are more politically aware than others... Public opinion was aware and angry... Children should be creative and aware.* ◊ **awareness**. EG *He was surprised by the students' political awareness.* ADJ QUALIT : USU PRED ◊ N UNCOUNT ⇑ knowledge

awash /əwɒʃ/. **1** If the ground or a floor is **awash**, it is covered in water, often because of heavy rain or as the result of an accident. EG *In the monsoon the whole place is awash.* ADJ CLASSIF : PRED ⇑ wet = flooded

2 If a place or a period of time is **awash** with a particular type of thing or person, it contains a large number or amount of it, especially when this is considered to be too much. EG *During the mid-1960s the world became awash with dollars.* ADJ CLASSIF : PRED+*with* ⇑ full = flooded

away /əweɪ/. **1** If you move **away** from somewhere, you move so that you are further from that place. EG *He rose and walked slowly away... I kissed her goodbye and drove away... I want to get away from here.* ADV AFTER VB ⇑ off ≠ back, towards

2 If you look or turn **away** from someone or something, you move your head so that you are no longer looking at that person or thing. EG *He looks away... Castle turned away... 'Nonsense,' Etta said, turning her head away.* ADV AFTER VB ≠ towards

3 If something is situated **away** from a person or thing, it is at a distance from that person or thing. EG *He stood near the door, away from Uncle Harold... I tried to keep as far away from people as possible... ...a pleasant green picnic spot away from the city.* ADV+PREP : USU +*from* ⇑ distant

4 You say that a place is situated a particular distance **away** in order to indicate how far that place is from where you are or how long it takes you to travel there. EG *Jack was standing under a tree about ten yards away... It's miles away... She had offers of scholarships from colleges as far away as California... I was only four hours away from Oslo.* ADV = off

5 If a landscape stretches or extends **away**, it stretches or extends into the distance. EG *...lovely flat fields which rolled away for miles and miles to the sky.* ADV AFTER VB

6 If you put something **away** or hide it **away**, you put or hide it in a safe or secret place. EG *Tom put the book away... ...this impressive tomb, hidden away in the depths of the country... This work on Sachsenhausen is not yet ready to be filed away in the archives.* ADV AFTER VB

7 If you are **away**, you are not at home or in the place mentioned, but somewhere else, for example on holiday. EG *The Spanish consul in Cardiff was* ADV AFTER VB

away at the time... Is he at home or has he gone away?... They've been away from home at a boarding school.

8 If an event is a particular period of time **away**, it will happen that amount of time in the future. EG *The debate on the Afghan crisis is only a fortnight away.* ADV

9 If you give something **away** or if someone takes it **away** from you, it is given to someone else and so is no longer in your possession. EG *She gave a fortune away... She took you away from me, Alistair.* ADV AFTER VB

10 If a team such as a football team or a hockey team is **away** or is playing **away**, it is playing a game on its opponents' ground, not on its own. EG *We're playing away on Saturday.* ▸ used as an adjective. EG *...an away match.* ADV AFTER VB ≠ at home ▸ ADJ CLASSIF : ATTRIB ≠ home

11 Away is also used **11.1** to show that something slowly and gradually disappears or dies so that it no longer exists. EG *The snow had all melted away... The hut rotted away... A murmur rose among the boys and died away.* **11.2** to show that something is removed or destroyed. EG *The damaged wood will probably have to be cut away... Her fingernails were worn away... Children always hope that 'someone else' will clear the mess away.* **11.3** to show that there has been a change or development from one state or situation to another. EG *We must wrench the Parliamentary system away from its feudal origin... His people wanted to move away from the rigid conservative orthodoxy that had prevailed until now... ...the shift away from crimes of theft.* **11.4** to show that numbers, amounts, or rates are less than they were. EG *The student membership fell away substantially at the beginning of the 1970s... Official Trade Union support dropped away.* ADV AFTER VB ⇑ off ADV WITH VB ≠ towards ADV AFTER VB

12 Away is also used after verbs to emphasize a continuous or repeated action. EG *Howard, forgetful of the time, was still working away in the university library... She was coughing away... He gazed for a few moments at his wife in front of him, stitching away.* ADV AFTER VB

13 ● **far and away**: see **far**. ● **right away**: see **right**. ● See also **straightaway**.

awe /ɔː/, **awes, awed**. **1 Awe** is the feeling of respect and amazement that you have when you are faced with something wonderful, frightening, or completely unknown. EG *The child stared at him in silent awe... An expression of awe animated their faces... ...something to be treated with awe and wonder.* N UNCOUNT ⇑ respect = wonderment

2 When you **are in awe of** someone or **stand in awe of** them, you have a lot of respect for them and are actually slightly afraid of them because they seem much more important than you are. EG *He seems slightly in awe of his own wife... She is in awe of his learning and of him... They rather stand in awe of Charles.* PHR : VB INFLECTS

3 If something or someone **awes** you, they make you feel utterly amazed and often rather frightened; a literary use. EG *The silence awed them... They were awed by him and looked at each other in uneasy admiration.* ◊ **awed**. EG *The men looked at one another silently, awed... ...talking in an awed whisper.* V+O : NO CONT ⇑ overwhelm = impress ◊ ADJ CLASSIF ⇑ overwhelmed

awe-inspiring. Someone or something that is **awe-inspiring** causes you to feel respect for them because they are slightly frightening or are very important. EG *I found her somewhat awe-inspiring and difficult to talk to... It was an awe-inspiring sight.* ADJ QUALIT ⇑ overwhelming = awesome

awesome /ɔːsəm/. Something that is **awesome** has the power or quality to make people feel amazed and full of admiration or fear because of its size, difficulty, etc. EG *...the awesome complexity of the universe... ...an awesome responsibility... ...an awesome weapon of war.* ◊ **awesomely**. EG *The crowd, orderly, awesomely hushed, had filled the square.* ADJ QUALIT ⇑ overwhelming ◊ ADV

awe-struck; also spelled as one word. Someone who is **awe-struck** or **awe-stricken** is suddenly faced with something that gives them a feeling of awe; a fairly formal word. EG *I am a little awestruck by what I heard... Celia's tone was awe-struck... ...watching with awestruck interest.* ADJ QUALIT ⇑ overwhelmed

awful /ɔːful/. **1** If you say that something is **awful**, you mean that it is **1.1** not very good or not very nice. EG *Isn't the weather awful?... Gas smells awful... The road is awful; narrow and bumpy... What an awful thing to say... ...married to that awful man.* **1.2** very unpleasant or very bad, causing people to feel shock, fear, or sadness. EG *...an account of that awful war... My second husband had an awful death.* ADJ QUALIT ⇑ nasty = dreadful ≠ wonderful ADJ QUALIT = horrific

2 If someone looks or feels **awful**, they look or feel ill. EG *I felt awful last night... God, he looks awful... My neck felt awful.* ADJ QUALIT = terrible ≠ well

3 Awful, especially in the expression **an awful lot**, is used to emphasize how good, bad, etc something is or how much of something is needed. EG *It must have taken an awful lot of courage... I don't know an awful lot about it... It takes an awful long while.* ◊ **awfully**. EG *She was awfully nice... It was awfully difficult trying to talk to her... He was an awfully good rugby player... I'm not awfully certain what they are... I'm awfully sorry, we haven't got any... It's awfully good of you to come with me.* ADJ CLASSIF : ATTRIB ⇑ great = tremendous ◊ ADV + ADJ/ADV ⇑ very = terribly

4 Awful also means causing fear and awe; a literary use. EG *...an awful calm.* ADJ CLASSIF : ATTRIB = awesome

awhile /əwaɪl/ means for a short time. EG *Can't you just wait awhile and not talk?... I don't want to get married yet awhile.* ● If you do something **for awhile**, you do it for a short time. EG *He watched, enjoying the spectacle for awhile.* ADV ● PHR : USED AS AN A

awkward /ɔːkwəd/. **1** A movement or a position that is **awkward** is uncomfortable and clumsy and not at all elegant. EG *...an awkward gesture... One of his arms hung in an awkward way that told Kunta it had been broken.* ◊ **awkwardly**. EG *He manoeuvred the boat awkwardly round... He fell and lay awkwardly, covered in mud.* ADJ QUALIT ≠ graceful ◊ ADV WITH VB ≠ skilfully

2 Someone who is **awkward 2.1** feels embarrassed, shy, or nervous and behaves in a way that shows other people that this is how they feel. EG *I hated the big formal dances and felt very awkward and out of place.* ◊ **awkwardly**. EG *She had wept, and Sonia had patted her shoulder awkwardly.* ◊ **awkwardness**. EG *She and Diana were great friends and there was no awkwardness between them.* **2.2** is difficult to live or to deal with because you are never quite sure how they are going to react or because they make unreasonable demands. EG *Of course Julia is a very awkward girl to be with... He will have to leave early because his wife is so awkward.* ADJ QUALIT = uncomfortable ≠ relaxed ◊ ADV WITH VB ◊ N UNCOUNT ⇑ unease ADJ QUALIT

3 A tool, machine, or job that is **awkward** is difficult to handle, use, or do. EG *The machine was very awkward to use.* ADJ QUALIT = tricky ≠ easy

4 A situation that is **awkward** is embarrassing and difficult to deal with. EG *It was going to be awkward keeping my news from Ted... The press conference came at an awkward time for me... You get some bloke who asks you a lot of awkward questions.* ◊ **awkwardness**. EG *They were great friends and there was no awkwardness between them.* ● If someone **makes things awkward** for you, they make them as difficult as possible, and cause you a lot of trouble and worry. EG *McPherson started making things awkward for him too.* ADJ QUALIT = tricky ≠ easy ◊ N UNCOUNT PHR : VB INFLECTS

awning /ɔːnɪŋ/, **awnings**. An **awning** is a piece of canvas or thick material, attached to a caravan, building, etc, which shelters people or things from the rain or the sun. EG *The shop was freshly painted, with a large green awning to protect the plate glass window... ...vegetables standing outside under a leaky canvas awning.* N COUNT ⇑ shelter = canopy

awoke /əwəʊk/ is the past tense of **awake**.

awoken /əwəʊkəⁿn/ is the past participle of **awake**.

awry /əraɪ/. **1** If something is **awry**, it is not in its normal or proper position, or it is not tidily arranged. EG *His tie was awry.* ADJ QUALIT : PRED = askew

2 If something goes **awry**, it does not happen in the way it had been planned and it goes wrong. EG *A nuclear test went awry when they underestimated the power of the explosion... A strike threw all the schedules awry.* ADJ QUALIT : PRED

axe /æks/, **axes, axing, axed**. **1** An **axe** is a tool used for cutting wood, for example for cutting down trees or for chopping logs. It consists of a rectangular metal blade, sharpened on one side and attached at the other side to the end of a handle. EG *One of them chopped through the planks with her axe.* N COUNT

2 If you **have an axe to grind**, you have a particular belief or a desire to make something happen, which you keep telling people about in order to persuade them that you are right or that something must be done. EG *The group claimed that it had no axe to grind... ...evidence of the members of the council, who have no axe to grind.* PHR : VB INFLECTS

3 If the government, an organization, or a company V+O

axes something, it suddenly ends it completely or reduces it drastically, usually because there is not enough money for it. EG *The new chairman decided to axe parts of the group, in an attempt to return to profitability... After six months the project was axed by the government.* ▸ used as a noun. EG *...the Government spending axe.* ▸ N COUNT : USU SING + SUPP

axes. **Axes** is pronounced /æksɪz/ in sense 1 and /æksi:z/ in sense 2. **Axes** is 1 the plural of **axe**. 2 the plural of **axis**.

axiom /æksɪəm/, **axioms**. An **axiom** is a statement of an idea which people accept as being true, although it is not necessarily so. EG *It is an old axiom that the more people know a secret, the less of a secret it is likely to be.* N COUNT ⇑ principle = saying

axiomatic /æksɪəmætɪk/. If something is **axiomatic**, it seems to be very obvious and therefore does not need to be proved; a formal word. EG *It has come to be regarded as axiomatic that good nutrition must always imply eating expensively.* ADJ CLASSIF : USU PRED ⇑ obvious

axis /æksɪs/, **axes**. 1 An **axis** is an imaginary line along which something can be divided equally, or around which it moves evenly. EG *The island was approximately twelve miles long on its north-south axis... The earth's axis is tilted at an angle of about 23½... ...the strategic importance of identifying the two main axes of attack.* N COUNT

2 An **axis** of a graph is one of the two sides of a graph, on which a particular quantity or quality is measured. The two axes are often referred to as the X axis and the Y axis. EG *Temperature is on the Y axis.* N COUNT ⇑ side

axle /æksəl/, **axles**. An **axle** is a rod connecting a pair of wheels on a car or other vehicle, on which the wheels turn. N COUNT

aye /aɪ/, **ayes**; also spelled **'ay**. 1 **Aye** means yes; used in some dialects of British English, especially in Scotland. EG *'It was awful cold.'–'Aye, it was.'* CONVENTION = yes

bawl out. **1** If someone **bawls** you **out**, they tell you off angrily for doing something wrong; used in informal English. EG *I was used to being bawled out at school for not doing homework.* PHRASAL VB : V + O + ADV ⇑ reprimand = scold

2 If you **bawl** something **out**, you shout or sing it very loudly and rather harshly. EG *...hecklers bawling out, 'What about pensions?'* PHRASAL VB : V + O/REPORT-CL/QUOTE + ADV

bay /beɪ/, **bays, baying, bayed**. **1** A **bay** is **1.1** a part of a coastline where the land curves inwards. EG *...a bay surrounded on three sides by vertical cliffs...* N COUNT : ALSO IN NAMES ⇑ area

...*Shark Bay*... ...*the Bay of Biscay*. **1.2** a space or area in a building or yard that is intended to be used for a particular purpose. EG ...*the corridor beyond the loading bay*. • See also **sick bay**. **1.3** an area of a room that is set back from the rest of the room, often one that juts out beyond the main walls of the building.

2 At bay. **2.1** If you **keep** or **hold** something that frightens or upsets you **at bay**, you keep it at a safe distance or prevent it from happening. EG ...*lighting a fire to keep dangerous animals at bay*... *Only an orderly approach to our work will keep chaos at bay*. **2.2** If an animal or person is **at bay**, they have been forced into a place or situation where they cannot escape from the people who are attacking or pursuing them. EG ...*a stag at bay*.

3 When a dog or wolf **bays**, it makes a deep howling noise. EG ...*wolves baying at the moon*.

4 A **bay** is also **4.1** a small evergreen tree. Its leaves are dried and used as a herb in cooking. EG ...*a bay leaf*. **4.2** a reddish-brown horse.

bayonet /beɪənɪ²t/, **bayonets, bayoneting, bayoneted**. **1** A **bayonet** is a long, sharp blade that can be fixed to the end of a rifle and used as a weapon.

2 To **bayonet** someone means to stab them with a bayonet.

bay window, bay windows; also spelled with a hyphen. A **bay window** is a window that sticks out from the outside wall of a house, where there is an area set back from the rest of the room inside the house.

bazaar /bəzɑ:/, **bazaars**. A **bazaar** is **1** an area where there are many small shops and stalls, especially in the Middle East and India. **1.2** a sale, often of home-made things, to raise money for charity.

bazooka /bəzu:kə/, **bazookas**. A **bazooka** is a long, tube-shaped gun that is held on the shoulder and fires rockets.

BBC. The **BBC** is a British organization which broadcasts programmes on radio and television; an abbreviation for 'British Broadcasting Corporation'. EG *How should the BBC be financed?* ▸ **BBC** is also used to refer to particular channels on television and radio. EG *It's on Monday evenings on BBC2*.

B.C. is an abbreviation for 'before Christ'; used when referring to a particular year or century before the year in which Jesus Christ was born. EG *It was not until about 1600 B.C. that the chariot was invented*.

be /bi:/, **am, are, is; was, were; being, been**. For explanations of the use of these forms, see the individual entries. **1 Be** is used as an auxiliary in the following ways to form many of the tenses of English verbs: **1.1** with a present participle to form the continuous tenses of verbs. EG ...*a problem which is getting worse and worse*... *I don't know where the people were all going*... *I've been coming here for almost twenty years now*. **1.2** to form the passive voice, followed by a past participle. EG *More than 40,000 demonstrators were arrested*... *They were all seated at the table*... *Most of the world's energy is supplied from fossil fuels*... *You have been warned*... *New plans are now being made*. **1.3** with an infinitive to say that something is planned to happen, that it will definitely happen, or that it must happen. EG *After dinner they were to go to a movie*... *It is to be a peaceful, non-violent protest*... *He is to be honoured for it*... *You are to be home by 10 o'clock at the latest*. **1.4** with an infinitive to say or ask what should happen or be done in a particular situation, how it should happen, or who should do it. EG *What is to be done with the wastelands of old industry?*... *Who is to question him?*... *He is to be congratulated on his success*. **1.5** in the past tense, 'was' and 'were', to talk about something that happens later than the time you are discussing. EG *There was to be a general election*... *He was to change dramatically during his adolescence*. **1.6** to say that something can be seen, heard, or found in a particular place or doing a particular thing. EG *It is now to be found in the Tate Gallery*... *He is to be seen every evening taking his dog for a walk*.

2 Be is used to express the relationship between the subject of a sentence and its complement or adjunct. It brings them together in one clause so that more information can be added about the subject. It is used in the following ways: **2.1** followed by a noun or a proper noun to name someone or something. EG *I'm Julian and this is my friend Sandy*... *It's a frog, isn't it?*... *Are you Colonel Argoud?*... *Her name is Melanie*... *The head of the corporation is Sir Paul Simpson*. **2.2** with the impersonal pronoun 'it' to describe something or mention one of its qualities. EG *It was terribly hot and airless*... *It's a pity, but there's nothing we can do*... *It's a lovely day, isn't it?* **2.3** to bring together complex subjects and complements in a wide variety of structural forms, some of which are shown here. EG *The problem is knowing when to stop*... *This attempt to influence the ballot is in breach of the rules*... *All you have to do is put another engine in*... *The prospect is not quite as black as the politicians suggest*... *Their aim was to arrive at exactly six o'clock*. **2.4** with a partly redundant subject to delay the final piece of information. It is possible to omit part of the subject and 'be' and yet still convey the same information. For example, 'It was John who bought the car' can be changed to 'John bought the car'. EG *What I'm talking about is the satellite that fell out of its orbit*... *What is needed is something more radical*... *It is love that makes the world go round*. **2.5** to introduce a statement or question and indicate its general type, nature, or subject. EG *The rule is: if in doubt, dry clean*... *The trouble is, then it's too late*... *The interesting thing is how do people perceive it?* **2.6** followed by a noun or a pronoun to give more information about the subject of the clause. EG *Marc was an extraordinarily bright lad*... *He was an old friend of mine*... *It isn't a very good drawing, is it?*... *The books were his*. **2.7** followed by an adjective or a prepositional phrase to give more information about the subject, often by mentioning one of its qualities or features. EG *The house was big and old*... *'Is he Jewish?' she asked*... *He was in the German army*... *Are you ready?* **2.8** to give information about time, days, dates, etc. EG *It was about four o'clock in the afternoon*... *Morris thought it was a little early in the morning for whisky*... *This was in May 1973*. **2.9** to give information about the age of a person or thing. EG *Rose Gibson is twenty-seven and works as a money dealer*... *The day centre itself is five years old in March*. **2.10** followed by an adverb or a prepositional group of place to tell you where the subject is. EG *This time next week I'll be back in St Louis*... *Is she in Oxford?*... *His father was not in the house*... *The iron was in her left hand*... *I was at a reading of poems*... *They are downstairs*. **2.11** after a modal, especially 'should', 'would', and 'could', to say what the best or most effective action, solution, etc is. EG *The role of government should be to restrain demand*... *The best thing to do would be to write a letter*. **2.12** with the impersonal pronoun 'there' to say that something exists or happens. 'Be' cannot usually be used without a complement or adjunct, so this structure has the word 'there' as the subject, and the noun group that you want to refer to becomes the complement. EG *There is little evidence of a religious revival*... *There is no such thing as a happy marriage*... *They were frightened there would be another earthquake*... *There was a rustling of papers*... *There were a lot of books on shelves along the walls*...

3 In formal English, the form 'be' is used occasionally instead of the normal forms of the present tense, especially after 'whether'. EG *If you see somebody stealing something, go to the nearest person in authority, whether it be a schoolmaster or a policeman*.

4 Be is used in the forms 'be' or 'don't be' when you are giving someone advice, asking them to behave in a particular way, or encouraging them to do something. EG *'Be careful,' she said*... *'Pa,' Gretchen said, 'be serious.'*... *Don't be jealous of your children's affection for their teacher*.

5 If someone **is**, for example, a doctor, an engineer, or a farmer, they have the job mentioned. EG *He's a civil servant*.

6 If someone or something intends or is going to **be** a particular type of person or thing, they intend or are going to become that person or thing. EG *He simply decided to be a prince*... ...*How to be a good gardener*.

7 Something that **is** a particular amount of money costs that amount. EG *'How much was it?'–'£55'*...

11 If something **is**, it exists; used especially in literary or philosophical language. EG *To be or not to be... God is.* V = exist

12 If someone or something is, for example, **as** happy **as can be** or **as** silent **as could be**, they have that quality or feeling to the greatest extent possible. EG *It was as quiet as could be.* PHR: USED AS A

13 You say **to be fair, to be frank, to be serious,** etc in order to introduce a statement and to indicate that you are now changing the tone or the mood of what you were saying, and that you are being fair, frank, or serious. EG *To be frank, I see them every morning.* PHR: USED AS ADV SEN = actually

14 be that as it may. You say **'Be that as it may'** when you want to change the subject, without reaching a decision about whether what has just been said is right or wrong. PHR: USED AS ADV SEN

be in for. If you **are in for** something, you are going to experience it or get it; an informal expression. EG *You'll only be in for a disappointment... We may be in for some student trouble here.* PHRASAL VB: V+ADV+PREP

be on to. **1** Someone who **is on to** or **onto** something has discovered something that is likely to lead to success or to solve a problem; an informal expression. EG *Mr Haig is on to something.* PHRASAL VB: V+ADV+PREP, OR V+PREP

2 If you **are on to** or **onto** someone, you have discovered what they are doing, even though they were trying to keep it secret; an informal expression. EG *I think they're on to us.* PHRASAL VB: V+ADV+PREP, OR V+PREP = suspect

BE □ **Be** can be used as a V+C or a V+A and as an auxiliary. The meanings of the auxiliary, described as AUX in the grammar notes, are given in paragraph 1 of the entry for **be**. BE used as an auxiliary behaves in the following ways. **1** It is followed by a present participle, a past participle, or a *to*-infinitive. **2** It inflects. **3** *Am, are, is, was,* and *were* are used before the subject in questions, as in *Is she going?... How was he feeling?* **4** *Am, are, is, was,* and *were* are used before the negative *not*, as in *I am not a doctor.* The word *not* has a shortened form *n't* which can be added to *is, are, was,* and *were* as in *They aren't very pleased... She isn't there.* **5** It can be used to stand for a previous verbal group in which 'be' is used as auxiliary, as in *'Was she at the same hotel?'–'No, she wasn't'... She wasn't enjoying it but the children were.* **6** It is used in tags, as in *She's Welsh, isn't she?... They weren't ready, were they?* **7** It can be used after another auxiliary or modal and before another form of 'be', as in *It is being built... I have been there before... She must be sleeping.*

be- is a prefix which is added to verbs, usually past participles, and to adjectives formed from a noun and an '-ed' suffix to indicate that a person or object is covered with something. EG *...jewel—bejewelled... ...smear—besmeared... ...deck—bedecked.* PREFIX

beach /biːtʃ/, **beaches, beaching, beached**. **1** A **beach** is an area of sand or pebbles beside the sea. EG *...a sandy beach... Tourists go there to walk on the beach.* N COUNT ⇑ shore

2 If you **beach** a boat or if a boat, whale, or other large object **is beached**, it is pulled or forced out of the water and onto land. EG *Our boat was beached on a sandbank... The boats beached and men began to walk ashore.* V ERG

beach ball, beach balls. A **beach ball** is a large, light ball filled with air, which people play with, especially at the seaside. N COUNT ⇑ toy

beachcomber /biːtʃkəʊmə/, **beachcombers**; also spelled with a hyphen. A **beachcomber** is someone who spends their time wandering along beaches looking for usable things, especially objects of value. N COUNT

beachhead /biːtʃhed/, **beachheads**; also spelled with a hyphen. A **beachhead** is an area of land next to the sea or a river where an attacking army has taken control and can prepare to advance further inland. EG *The Allies established a firm beachhead in Normandy.* N COUNT

beacon /biːkən/, **beacons**. A **beacon** is **1** a light or a fire on a hill or tower, which acts as a signal or a warning that something is happening. EG *...lighting the first beacon of a chain of 101 signals... Her influence for good shone from her like a beacon.* **2** a hill where a light or fire used to be lit as a signal or a warning of enemy invasion. EG *We walked along the top to the Worcestershire Beacon.* ● See also **Belisha beacon**. N COUNT = torch

N COUNT: ALSO IN NAMES

bead /biːd/, **beads**. **1 Beads** are small pieces of coloured glass, wood, plastic, etc, usually round in shape with a hole through the middle. Beads are often put together on a piece of string or wire to make necklaces, bracelets, etc. EG *...bead necklaces... ...strings of beads.* N COUNT: USU PL ⇑ ball

burying /bɛ̲riˈɪŋ/. A **burying** place or **burying** ground is the same as a burial ground.

bus /bʌs/, **buses; busses, bussing, bussed**. **Buses** is the plural of the noun. **Busses** is the 3rd person singular, present tense, of the verb. The verb is also spelled **buses, busing, bused** in American English. 1 A **bus** is a large vehicle which carries passengers from one place to another. A bus is driven along a particular route and you have to pay to travel on it. EG *I'm waiting for the bus back to town... I could go by bus... Jenny must've missed the last bus again... ...a bus driver.*

2 When someone **busses** to a particular place or when they **are bussed** there, they travel there on a bus. EG *One has the option of walking one way and boating or bussing back... Supporters were bussed in to take part in the march.*

3 In the United States, if children **are bussed** to school, they are transported by bus to a school in a different area in order that children of different social classes or races can be educated together.

busby /bʌzbiˈ/, **busbies**. A **busby** is a tall fur hat that is worn by some British soldiers on ceremonial occasions.

bus conductor, bus conductors. A **bus conductor** is an official on a bus who collects money from the passengers and checks their tickets.

bush /bʊʃ/, **bushes**. 1 A **bush** is a large plant which is smaller than a tree and has a lot of woody branches. EG *...a gorse bush... I peered through the bushes.*

2 The **bush** is the wild, uncultivated area of Australia, New Zealand, Africa, and other hot countries. EG *I went for a walk in the bush... ...the Mozambique bush... ...a bush fire.*

3 If you say that someone has a **bush** of hair, you mean that they have a large amount of it. EG *Her spectacles were nestling in her grey bush of hair.*

4 If you do not **beat about the bush**, you say what you want to say or answer a question immediately and directly rather than trying to avoid doing so. EG *Don't beat about the bush no matter how embarrassed you are.*

bushbaby /bʊʃbeɪbiˈ/, **bushbabies**; also spelled as two words. A **bushbaby** is a small furry African animal that has very large eyes and a long tail and lives in trees.

bushed /bʊʃt/. If you say that you are **bushed**, you mean that you are very tired; an informal word. EG *I'm pretty bushed after last night.*

bushel /bʊʃəˈl/, **bushels**. 1 A **bushel** is a unit of volume that is equal to eight gallons or about 36.4 litres. EG *...five bushels of oats.*

2 If you **hide** your **light under a bushel** or **hide** your talents, abilities, etc **under a bushel**, you keep your abilities or good qualities hidden from other people. EG *There were many lights hidden under his bushel... He was not a man much given to hiding his own brilliance under a bushel.*

Bushman /bʊʃməˈn/, **Bushmen**. A **Bushman** is a member of one of the tribes of people in southern Africa.

bushy /bʊʃiˈ/, **bushier, bushiest**. Hair or fur that is **bushy** grows very thickly. EG *...bushy eyebrows... ...a bushy tail.*

busily /bɪzɪliˈ/. If you do something **busily**, you do it in a very active way, or with a lot of concentration. EG *Some children were busily catching crabs... I went on writing busily.*

business /bɪznɪs/, **businesses**. 1 **Business** is **1.1** work relating to the production, buying, and selling of goods or services. EG *He had made a lot of money in business... ...a leading industrialist with business interests in Germany... Phone during business hours.*

1.2 the activity of buying, selling, or exchanging goods in deals with people or companies. EG *Firms that do business with Britain... You should deal fairly in business.*

2 If **business** is good for a particular shop or company, it is selling a lot of goods or services, and if **business** is bad, it is not selling a lot of goods or services. EG *Business was awful... 'How's business?'–'Quiet.'*

3 A **business** is an organization which produces and sells goods or which provides a service. EG *He set up a small travel business... ...the company directors who actually run the business... The new business grew and grew.*

4 **Business** is also work or some other activity that you do as part of your job as opposed to activities that you do for pleasure. EG *Are you in San Francisco for business or pleasure?... He had a business appointment... When travelling on business I take my tiny travel sewing kit.*

5 The particular **business** that you are in is the area of activity in which you work in order to earn your living. EG *What business are you in?... There are good profits to be made in the hotel business.* ● See also **show business**.

6 Your **business** is **6.1** something that you are doing or concerning yourself with at the moment. EG *He wanted to be left alone to go about his business... She got on with the business of clearing up.* **6.2** something that concerns you personally and that other people have no right to ask you about or get involved in, or something that you have a right to know about or be involved in. EG *Let me worry about my business... That's her business... It's no business of mine what you choose to read... He made it his business to find out... It is not our business to enquire why he did it.*

7 **Business** is also important matters that you have to discuss or deal with. EG *I've some important business to discuss... Let's talk business... Let's get down to business now.*

8 You can refer to an event, activity, or situation as, for example, 'a dreadful **business**' or 'this assassination **business**' rather than referring to it in a more exact or detailed way. EG *The whole business affected him profoundly... It's a dreadful business... This assassination business has gone far enough... Clearing the forest is a laborious business.*

9 You can also use **business** to refer to behaviour or activity of a particular kind when you are being unclear and not giving details about it. EG *...secret business... They run the universities and all that kind of business.*

10 You describe a task as a **business** when you find it difficult or boring and annoying. EG *It's a real business filling in this form.*

11 If you say that a dog or other animal **is doing its business**, you mean that it is defecating; an informal expression.

12 If you say that someone **has no business** to do something, you mean that they have no right to do it. EG *She had no business to publish his letters to her.*

13 In informal English, if someone says they **are in business**, they mean that they have got or arranged everything they need in order to do something and can now start it. EG *Now we're really in business.*

14 A person, shop, or company that is **in business** is currently operating and trading. EG *50% of these stores were not in business five years ago.*

15 If you say that someone is doing something **like nobody's business** or that something is happening **like nobody's business**, you mean that they are doing it or it is happening very quickly and actively; a rather old-fashioned, informal expression. EG *They're working away like nobody's business.*

16 If someone **means business**, they are serious about what they are doing, especially if it is something that will harm or upset other people, and they are determined to do it; an informal expression.

17 If you say to someone **'mind your own business'**, you are telling them not to ask about or get involved in something that does not concern them; an informal and rude expression.

18 If you say that something is **none of** someone's **business**, you mean that it is something that does not concern them and that they have no right to know about. EG *That's none of your business.*

19 People, shops, or companies go **out of business** when they do not make enough money to continue

but /bʌt, bət/, **buts**. **1** You use **but** after you have made a negative statement to introduce a statement about what is in fact the case. EG *This is not the result of unemployment but the result of sheer vandalism... The family doesn't see it as a chore but a sensible necessity... They don't need to know all the answers but they need to know how to find out the answers.* CONJ COORD : AFTER BROAD NEG

2 You can also use **but** to introduce a statement which contradicts or makes a contrast with what has just been said, or which indicates that the previous CONJ COORD = yet

statement is not significant in relation to what you are about to say. EG *The chapel was just an ordinary, crumbling box, but inside was the most magnificent marble altar... ...a cheap but incredibly effective carpet cleaner... We'll have a meeting. But not today... It was a long walk but it was worth it... He has promised reform but failed to deliver it... This vital exuberance might make one think the soil is very fertile. But it isn't... In 1950 oil supplied only about 10% of our total energy consumption; but now it is up to about 40% and still rising.*

3 You can also use **but** when you are about to add something further in a discussion, for example when you think that a particular point has not been adequately discussed. EG *'I think Brooks has actually looked towards British humour as a guiding light in this respect.'–'But another thing that he brings in is the comedy of being Jewish.'* CONJ COORD

4 You can also use **but** after 'yes' or 'no' to add a comment which, although it does not contradict your answer, indicates that your 'yes' or 'no' does not fully express what you think and that something else needs to be said. EG *'Nobody can understand James Joyce.'–'Ah yes, but that's the beauty of him you know.'... 'It was Montefiori,' one of them said. 'No, but it started with an M.'... 'I thought you'd make your home with me.'–'Yes, but–'–'There's no yes but.'* CONJ COORD : *yes/no* + CONJ = though

5 You can also use **but** to indicate that you are about to change the topic of what you are saying. EG *Later we'll be discussing the films of Alfred Hitchcock, but first, this week's new releases... But let's start at the beginning.* CONJ COORD = though

6 You can also use **but** to introduce a reply to someone when you want to indicate reluctance, disbelief, refusal, or protest. EG *That's very kind of you. But I'm terribly busy on Saturdays... 'Somebody wants you on the telephone.'–'But no one knows I'm here.'* CONJ COORD

7 You can also use **but** after you have said that two things are alike when you give the feature which makes one different from the other. EG *Wolfe. Like the animal. But with an e... The bear was about my height when it stood up, but round and large and powerful.* CONJ COORD = except, only

8 You can also use **but** after you have made an apology for what you are just about to say. EG *I'm sorry, but she's not in at the moment... Excuse me, but I think you're wrong there... Forgive my ignorance, but just what is Arista?* CONJ COORD

9 You can also use **but** to introduce a view or a statement which you have already criticized or tried to excuse, because you still feel that it is important enough to mention. EG *I may be old-fashioned, but why don't they write nice songs any more?... Call it a national vice, but most Englishmen dote on authoritarian women.* CONJ COORD

10 You can also use **but** to emphasize your surprise, admiration, shock, etc at a particular situation. EG *It's bad enough to come home and find one daughter pregnant. But both of them!... I thought I might get a couple of replies. But this is astonishing!... It was mink. But what a glorious colour!* CONJ COORD

11 You can also use **but** to emphasize the word you have just used by introducing a repetition of the word. EG *It had everything but everything, even an indoor waterfall.* CONJ SUBORD = yes

12 You use **but then 12.1** to introduce a remark that suggests that what you have just said may not be right, or a piece of information that slightly contradicts what you have just said. EG *Iron would do the job better. But then you can't bend iron so easily... I always thought that. But then I'm probably wrong... You're the first person who's ever accused me of being irresponsible. But then it depends what you mean by responsible.* **12.2** to add a remark which suggests that what you have just said should not be regarded as surprising. EG *They're very close. But then, they've known each other for years and years... He's been a bit off-colour for the past few days. But then, who hasn't?* PHR : USED AS ADV SEN = still

13 But also means **13.1** except. EG *She couldn't eat anything but cucumbers... It hurt nobody but himself... It could do everything but stop... Who but a madman would administer a deadly poison... All but one of the thieves were caught.* **13.2** only. EG *Low cost and high speed are but two of the advantages of electronic data handling... When I first met her she had but recently divorced... 'Will you be able to do it?'–'I can but try.'* PREP = apart from ADV = just, only

14 You use **but for** to introduce the only factor that causes a particular thing not to happen or not to be completely true. EG *But for the sense of something watching them, Ralph would have shouted at him... But for you, I would be dead now... But for his ice-blue eyes, he looked like a bearded, wiry Moor.* CONJ SUBORD

15 You use **cannot but** and **could not but** when you want to emphasize that you believe something must be true and that there is no possibility of anything else being the case; used in formal English. EG *This phenomenal rate cannot but have some effect on the children... One cannot but admire him... We couldn't help but admire it.* CONJ SUBORD MODAL *(can/could)* + CONJ ⇑ must

16 The word **but** is also used in expressions like 'no buts', 'ifs and buts' to refer to a reason that someone gives for not doing something, especially when the speaker does not think that it is a good reason. EG *We are going–and no buts!... I'm tired of all your ifs and buts.* N PLURAL = excuses, objections

17 ● **anything but**: see **anything**. ● **last but one**: see **last**. ● **not only ... but also**: see **only**.

butane /bjuːteɪn, bjuːtɪn/ is a gas that is obtained from petroleum and is used as a fuel. N UNCOUNT

butch /bʊtʃ/. **1** If people describe a woman as **butch**, they mean that she behaves or dresses in a masculine way and that they think she is a lesbian; an offensive use. ADJ QUALIT

When Margaret collapsed, I called the doctor, who arrived almost immediately.* — V OR V + O = phone, ring; V + O ⇑ summon = send for

9 A **call** is **9.1** a communication that you receive or make by telephone. EG *There have been two telephone calls for you... I made a long-distance call to Aberdeen.* **9.2** a request from someone asking you to go to them. EG *The firemen in our town receive about twelve hundred calls a year... The doctor was soon on his way to answer the next call.* ● If someone such as a doctor is **on call**, they are ready to go out to work when someone asks them to, especially when there is an emergency. EG *The nurse had been on call for twenty-four hours... The army were always on call for situations where force was thought necessary.* — N COUNT; N COUNT; ● PHR: USED AS AN A

10 If the person in charge of a meeting **calls** someone **to order**, he or she asks them to behave according to the rules of the meeting; a formal expression. EG *He called the speaker to order.* — PHR: VB INFLECTS

11 If you **call** something such as a meeting or a rehearsal, you arrange for it to take place at a particular time. EG *He called a press conference to explain his proposals... The Prime Minister called a general election for June 9th... Whenever the union called a strike, the management agreed to negotiate.* — V + O ⇑ organize = announce

12 If someone **is called** before a court of law or some other judicial committee, they are ordered to appear there, usually to give evidence. EG *Mrs Flanagan had been called as a witness in her son's divorce case.* — V + O, OR V + O + A (*as*): USU PASS ⇑ summon

13 If you **feel called** to do something or **are called** to do something, you feel certain that God wants you to do it. EG *He believed that he had been called to become a monk. He felt called to work in the developing countries.* — PHR: VB INFLECTS ⇑ be destined

14 If you **call** on someone, you make a short visit to see them or to deliver something. EG *'Goodnight. Do call again.'... The postman calls about 7 o'clock every morning.* ▸ used as a noun. EG *We went to pay a call on some people I used to know...* — V: IF + PREP THEN *on/at*; ▸ N COUNT

15 When a bus, train, or ship **calls** at a particular place, it stops there for a short time to allow people to get on or off. EG *The 9 o'clock train calls at every station between Glasgow and Edinburgh.* — V + A ⇑ stop

16 In games and sports, if you **call**, you say that a coin will land with either the heads or the tails side upwards. You usually do this in order to decide who will do something such as serve first in tennis or bat first in cricket. EG *Gower called heads unsuccessfully for the third successive time.* — V OR V + O (*heads/tails*) ⇑ guess

17 If you use **call** in such expressions as 'Let's call it £5' and 'Shall we call it a pound?', you are suggesting to the person you are talking to that they should agree to the amount mentioned. EG *'I owe you some money. We'll call it £10, shall we?'–'That sounds about right.'* — V + O (*it*) + C

18 A **call** for something is a demand or desire for it to be done or to be provided. EG *Labour MPs renewed their call for the abolition of the House of Lords... There is little call for his services.* — N COUNT: IF + PREP THEN *for* ⇑ request

19 If you say that **there is no call for** someone to behave in a particular way, you are indicating that — PHR: VB INFLECTS

you disapprove of their behaviour and think that there is no good reason for it. EG *There is no call for you to be so rude.*

20 If you **have first call on** someone's time, help, etc, you know that if you ask them to do something they will do it before they do anything else because you are very important to them. EG *He has first call on his daughter's time.*

21 The **call** of something such as a place is the attraction or fascination that it has for you. EG *All his life he felt the call of the sea.*

22 If you have or feel a **call**, you believe that there is something that God wants you to do. EG *He decided that he must answer the call and become a priest.*

23 A **call** is also **23.1** the sound or cry made by a bird or an animal. EG *Each type of animal produces its own characteristic call... The boys spent the whole of one afternoon practising bird calls.* **23.2** a decision made by referee, umpire, or linesman in a sports match as to whether a ball is in or out of play. EG *McEnroe disagreed with the linesman's call.*

24 The word **call** is also used in the following expressions, which are explained at other places in this dictionary. ● to **call** someone's **bluff**: see **bluff**. ● to **call it a day**: see **day**. ● to **call a halt**: see **halt**. ● to **call** something **to mind**: see **mind**. ● **a call of nature**: see **nature**. ● to **call** something **into question**: see **question**. ● to **call it quits**: see **quit**. ● to **call a spade a spade**: see **spade**. ● to **call the tune**: see **tune**. ● See also **curtain call**.

call back. If you **call** someone **back**, **1** you telephone them again or in return for a telephone call that they have made to you. EG *I told him I would call him back when I had some news... 'I'm sorry, Mr Smith is out.'–'Would you ask him to call me back as soon as possible.'* **2** you ask them to return. EG *I was just leaving when my friend called me back.*

call down. If you **call down** something unpleasant on someone, you pray that it will happen to them. EG *She called down God's anger on her husband.*

call for. **1** If you **call for** someone, you go to their house to collect them because you are going out somewhere together. EG *I'll call for you about eight.* **2** If you **call for** something, **2.1** you go somewhere to collect it. EG *The parcel was kept at the Post Office until someone called for it.* **2.2** you demand that it should happen. EG *They passed a resolution attacking the government and calling for financial aid for the miners... The declaration called for an immediate cease-fire.*

3 Something that **calls for** a particular action or quality needs it in order to be successful. EG *Controlling a class calls for all your skill as a teacher.*

call forth. To **call** something **forth** means to make it exist; used in formal English. EG *He is not capable of calling forth much emotion in his readers.*

call in. **1** If you **call** someone **in**, you ask them to come to see you or to take action of some kind, often because you need help. EG *I was called in by my boss and given the good news... We called in the police and accused the boys of stealing.*

2 If you **call in**, you make a telephone call, often to the place where you work, to report where you are or what you are doing. EG *He called in to say he was feeling ill.*

3 If someone **calls** something **in**, they ask for it to be returned, for example because it might be dangerous or because it is needed. EG *Ford called in some Escorts to check their brakes... The university called in all library books for stocktaking.*

call off. **1** If you **call off** something that has been planned, you cancel it. EG *They hoped that the strike would be called off... I shall feel myself free to call off.*

2 If you **call** a dog or a person **off**, you order them to stop attacking something or someone else. EG *He called his dog off when he saw that mine was frightened of it.*

call on. **1** If you **call on** or **upon** someone to do something, you appeal to them to do it. EG *The Opposition called on the Prime Minister to stop the arms deal.*

2 If you **call on** or **upon** something such as your strength, you summon it up and use it. EG *She had to call on all her courage to accept her child's death.*

call out. **1** If you **call** something **out**, you shout it in a loud voice because you want someone to hear you. EG *Karen called out and told us to be quiet... The driver didn't stop or even call out thank you... She turned into the yard, calling out to the porter that she'd arrived.*

2 To **call** someone **out** means **2.1** to order them to come to help, especially in an emergency. EG *The government called out the army to help put out the fires... The National Guard has been called out by Governor Duck.* **2.2** to order them to go on strike. EG *They were called out for half a day.*

3 If one thing **calls out for** another, there is a very strong need for it to happen. EG *Even the smallest act of oppression calls out for universal condemnation.*

call up. **1** If you **call up** or **call** someone **up**, you telephone them; an informal use. EG *The radio station had an open line on which listeners could call up to discuss various issues... Many of my friends called me up to congratulate me on my success.*

2 To **call** someone **up** means to order them to join the army, navy, or air force. EG *I was extremely lucky not to be called up to fight in the last war.* ▸ also used to ask people to be prepared to play in a sports match. EG *The manager of Aston Villa has called up his latest recruit as reserve for Saturday.* ● See also **call-up**.

3 If something **calls up** a memory of some person or event, it causes you to remember them. EG *The museum called up memories of my childhood.*

4 If you **call up** information that a computer holds, you instruct the computer to present it to you. EG *He was able to call up the information he needed direct from the resource catalogue.*

call box, call boxes; also spelled with a hyphen. A **call box** is the same as a telephone box.

caller /kɔːlə/, **callers**. A **caller** is **1** a person who comes to see you for a short visit. EG *I had a lot of callers when I came home from hospital.* **2** a person who is making a telephone call. EG *The telephone rang and the caller asked to speak to my mother.*

call girl, call girls. A **call girl** is a prostitute who arranges meetings with her clients by telephone.

calligraphy /kəlɪgrəfi/ is **1** the art of producing beautiful handwriting using a brush or a special pen. **2** beautiful and artistic handwriting. EG *...an exhibition of Arabic calligraphy.*

calling /kɔːlɪŋ/. A **calling** is **1** a profession or career, especially one which involves helping other people. EG *Teaching is said to be a worthwhile calling.* **2** a strong feeling that you must do a particular job which involves helping people, especially as a priest.

calliper /kælɪpə/, **callipers**; also spelled **caliper**. **Callipers** are **1** instruments that are used to measure the size of things. They consist of two long thin pieces of metal joined together at one end by a hinge. **2** devices for supporting a person's leg when they cannot walk properly. They consist of metal rods that are held together by straps.

callisthenics /kælɪsθenɪks/; also spelled **calisthenics**. **Callisthenics** are simple exercises that you do to keep fit and healthy. EG *After a few days of doing calisthenics together, we added some simple karate exercises.*

callous /kælәs/. Someone who is **callous** is severe and cruel, and shows no concern for other people's feelings; also used to describe a person's behaviour. EG *She was selfish, arrogant and often callous... ...a shocking act of callous irresponsibility.* ◊ **callousness**. EG *It always distressed her, the callousness with which people were made to suffer.*

calloused /kælәst/. A foot or hand that is **calloused** is covered in calluses. EG *My feet became blackened, tough, split and calloused.*

callow /kælәʊ/. A young person who is **callow** has very little experience or knowledge of the way they should behave as an adult. EG *...a very callow youth.*

call sign, call signs; also spelled with a hyphen. A **call sign** is the letters and numbers which identify a person, vehicle, or organization that is broadcasting on the radio or sending messages by radio.

call-up, call-ups. **1** If a person gets their **call-up** papers, they receive an official order to join the army, navy, or air force; used in British English. **2** A **call-up** is the number of people who are ordered to report for service in the armed forces.

callus /kælәs/, **calluses**. A **callus** is an area of unwanted, unnaturally thick skin, usually on the

camshaft /kæmʃɑːft/, **camshafts**. A **camshaft** is a part of an engine consisting of a rod with one or more cams attached to it; a technical term. N COUNT

can, could; cans, canning, canned. In paragraphs **1** to 4.3, the word **can** is pronounced /kæn/ or /kən/; in paragraphs 5 to 9.2 it is pronounced /kæn/. The form **could** is used in paragraphs 1 to 4.3, and the forms **cans, canning, canned** are used in paragraphs 5 and 6. The modal verb **could** is normally used in reported speech where the words that were said included 'can', and so in that sense it acts as a past tense of the modal verb **can**. It is also used as the past tense of **can** in paragraph 3. Otherwise, the relationship between **can** and **could** is that **could** is used for events that are less likely or less definite. **1** **Can** is used **1.1** to indicate that it is possible for someone to do something or for something to happen. EG *Anybody can become a qualified teacher... I know a place where you can hire boots... Many elderly people cannot afford telephones... 'Will you stay for lunch?'–'I can't,' the colonel said... They complained that they couldn't sleep.* **1.2** with verbs expressing belief or opinion to indicate that you find something reasonable or acceptable or that you are prepared to do something. EG *We can see what he meant... I cannot accept this view... You can understand their feelings... I don't think you can draw a distinction between them... There can be no doubt about this.* **1.3** with 'I' and 'we' to indicate that an action is possible and that the person speaking is considering doing it. EG *I can pop in and see you tomorrow... We can plant a few trees in the garden.* MODAL MODAL MODAL ⇑ will

2 **Can** is used to express possibility in place of a range of other modals. It is used **2.1** to say that someone is allowed to do something. Some speakers of English think that it is incorrect to use 'can' instead of 'may' with this meaning, but in fact most speakers use both 'can' and 'may'. EG *In a Moslem marriage, the man can have as many wives as he wants... You can borrow that pen if you want to... There are rather detailed rules of when you can and can't appeal.* **2.2** in questions when you are asking for something, asking for permission to do something, or asking whether you can help. EG *Can I speak to Nicky please?... Can I light the fire? I'm cold... Can we have something to wipe our hands on please... Can I help you?... What can I do for you?* **2.3** in questions when you are asking someone to do something for you. EG *Can you tell me the time?... Can you do me a favour?... If you can just sign the booking form there for me please!* **2.4** in speech as a polite way of interrupting someone or of introducing what you are going to say next. These are polite requests which are not normally refused. EG *That sounds, if I can interrupt you, that sounds a very complicated argument... Can I just intervene for one moment?... Can I ask a question here now?* MODAL MODAL : USU + *I, we* = could, may MODAL : USU + *you* = could MODAL : USU + *I* = could

3 **Can** is also used to indicate that you have a particular skill or ability and are therefore able to do the thing mentioned. EG *Some people can ski better than others... He cannot dance... My wife can't sew... A lot of them couldn't read or write... I enjoyed teaching and I could actually do it.* MODAL

4 **Can** is also used in the following ways with a negative. **Cannot** or **can't** is used **4.1** to indicate that you think that it is very important or necessary that something should not happen or that someone should not do something. EG *We can't stop now. We've got to keep on struggling... 'I'm going to post a letter.'–'You can't!' said Phyllis. 'Suppose you're seen...' We can hardly blame her for ignorance.* **4.2** in questions when you are urging someone to do something, especially when there is some difficulty or when they do not want to do it. EG *Can't you find a baby-sitter and come over for dinner?... Can't we talk about it?... For goodness sake! Can't you keep your voice down?* **4.3** to indicate that you feel sure that something is not true or that something will not happen. EG *This cannot be the whole story... The repression can't last... Top secret, he said–but that* MODAL WITH BROAD NEG = mustn't MODAL + *not* MODAL WITH BROAD NEG

can't apply to you, can it?... The two conflicting messages cannot possibly both be true. ● **Can't have** is used to indicate that you are sure that what you are saying is true, or that you are sure that you are right to deny something, although you have no proof and do not know for certain. EG *He can't have said that. He just can't... Twenty francs can't have been nearly enough to pay for all the food.* ● MODAL WITH BROAD NEG

5 A **can** is a metal container in which something such as food, drink, paint, etc is put. The container is usually sealed so that the contents remain fresh for a long time. EG *...cans of beans... ...a tray of beer cans... ...a can of petrol.* N COUNT = tin
